

Title

2016 CX-9 - WRENCH LIGHT ON AND VEHICLE NOT DUE FOR SERVICE

Content

Customers may experience the wrench light on in the instrument cluster when the vehicle is not due for service, and the wrench light cannot be reset using normal methods. If this happens, check the MAZDA CONNECT version. This concern may happen if the vehicle was downgraded to Version 55.

Contact hotline for further instructions if the vehicle is found to have Version 55 of MAZDA CONNECT.
