

## High Mount Brake Light Detached from Rear Window

### AFFECTED VEHICLES

2016 Civic Coupe

Is the high mount brake light detached from the rear window? We're aware of this concern and have it under investigation. It appears to be heat related and reapplying the adhesive just provides a temporary fix.

We're working on a service solution and should have it available in the near future. In the meantime, **do not** replace any components. Doing so **won't** fix this concern.
