

Display Audio Randomly Beeps and/or Returns to HOME Screen on Its Own

AFFECTED VEHICLES

2016 Civic EX and above

Is the Display Audio randomly beeping and/or returning to the **HOME** screen on its own? We're aware of this issue and have it currently under investigation. So far, we know the center display unit is the culprit and **not** the audio unit.

This can be a tough issue to troubleshoot. To fix it, replace just the center display unit. We'll be posting a service bulletin this coming October with the details.
