

## **Front Brakes Squeal During Light to Moderate Braking**

### **AFFECTED VEHICLES**

2014–16 RLX

**EDITOR'S NOTE:** This article replaces the one posted in **July 2016** to extend the article's shelf life. The issue(s) covered are still being addressed.

Are you hearing a high-pitch squeal from the front brakes during light to moderate braking? We're aware of this issue and are looking for a solution.

In the meantime, replacing the brake pads and turning or replacing the brake discs may temporarily stop the noise.
