## Vehicle Technical Info

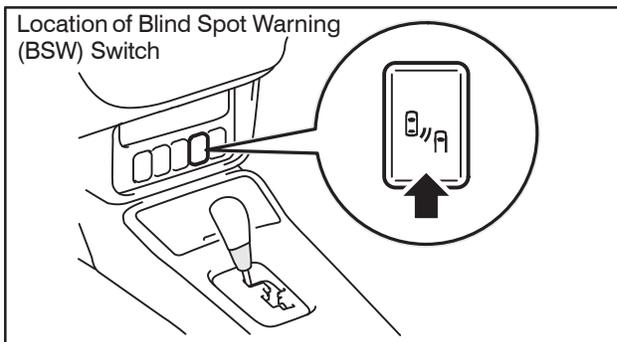

NOTE: The ✓ mark indicates an article is being repeated from a previous issue of Tech Talk due to the subject's importance.

### GROUP 00 – General

#### TURN BLIND SPOT WARNING (BSW) SYSTEM OFF WHEN TOWING — 2017 Outlander.

Dealers should inform customers that the Blind Spot Warning system should be set to OFF when towing a trailer, as instructed in the Owner's Manual. Customers should also be informed that turning off the BSW system also turns off the Rear Cross Traffic Alert (RCTA) at the same time.

### GROUP 31 – Wheel and Tire

#### ✓ PHOTO REQUIRED CONDITION (PRC) FOR TPMS SENSOR REPLACEMENT — 2014-17 Mirage and 2017 Mirage G4.

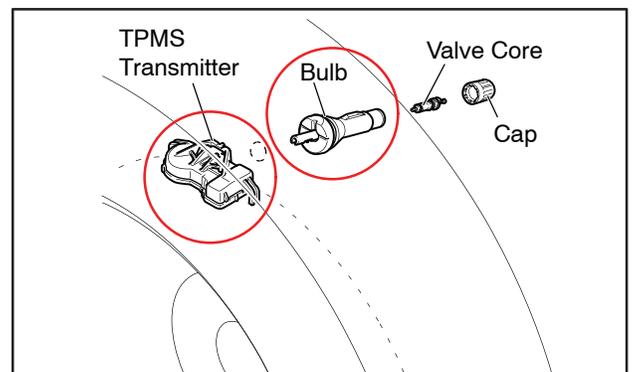

NOTE: This article is being reprinted to add 2017 model year Mirage and Mirage G4 vehicles.

If you replace a TPMS sensor on any 2014 - 2017 Mirage or 2017 Mirage G4 you are required to submit a photo to the PRC. The photo needs to show whether or not the TPMS sensor (body) was attached to the wheel (valve stem) when the tire was dismounted.

NOTE: Below is an example of the type of photo required by the supplier in order to perform further analysis.

Example PRC Photo

In addition to posting the photo, please report the failure DTC(s) on the PRC report, and add a comment describing whether or not the tire had ever been dismantled prior to this service (e.g., YES - The tire was dismantled prior to this service, or NO - the tire was never dismantled prior to this service). If it is not apparent that the tire was previously dismantled, the customer should be able to provide that information. MMNA will issue a Warranty Parts Return Request for all replaced (Mirage) TPMS sensors (which includes the valve stem and bulb in addition to the sensor body).

Once returned, the TPMS sensors will be combined with their respective PRC photos and forwarded to the supplier for analysis. Please continue posting the TPMS sensor photos to the PRC until a cancellation notice is published by MMNA headquarters. Upload PRC photos into the category titled "TPMS Sensors in Wheel Photos."

## **GROUP 36 – Parking Brake**

**TIN-16-36-001: DTCs SET IN ELECTRIC PARKING BRAKE ECU** — *Certain 2017 Outlander with F.A.S.T. Key and Electric Parking Brake.* TIN-16-36-001 was recently sent to dealers and states:

"During Port operations, the IOD (Ignition Off Draw) is pulled out (not inserted) and the engine switch (push-start button) is cycled from OFF to ACC to ON (brake pedal not depressed) and back to OFF, or cycled from OFF to ACC to ON (brake pedal depressed to start the engine) and back to OFF.

Due to some programming in the Electric Parking Brake system, DTCs can be set under these conditions. No warning lights are illuminated and no other issues occur with these DTCs.

- B1762 (IOD fuse not seated fully) can be set as an Active DTC under ETACS
- U0141 (ETACS CAN timeout) or U0415 (ABS/ASC CAN Message) can be set as Stored DTCs under EPB (Electric Parking Brake).

After the IOD (Ignition Off Draw) is fully inserted, B1762 (IOD fuse not seated fully) is no longer detected, but U0141 (ETACS CAN timeout) remains as a Stored DTC under EPB (Electric Parking Brake) and DTC U0415 (ABS/ASC CAN Message) could remain as a Stored DTC under EPB (Electric Parking Brake) as well.

If DTC U0141 and/or U0415 are the only DTCs retrieved under the EPB (Electric Parking Brake) system during normal vehicle service at the dealership, DO NOT perform any unnecessary diagnostic repairs for these DTCs. Perform an "all DTC" check and erase with MUT-III SE to address this concern. If, however, the same DTCs return, then perform the necessary diagnostics per the Service Manual procedures."

## **GROUP 52A – Interior**

**FRONT SEAT BELT STOPPER BUTTON AVAILABILITY** — *2013-15 Outlander Sport/RVR.*

In addition to the outer rear seat belt stopper button being available as service P/N 7000A360, MMNA has established P/N 7000F293 as the front seat belt stopper button service part. This new service part should be available soon, look for additional details in an upcoming publication.

**FELT TAPE TO BE APPLIED WHEN REPLACING CERTAIN FRONT SEAT COMPONENTS** — *2011-15 Outlander Sport/RVR.*

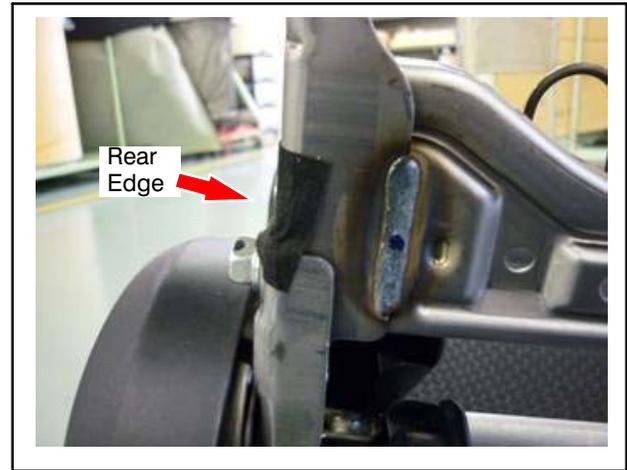

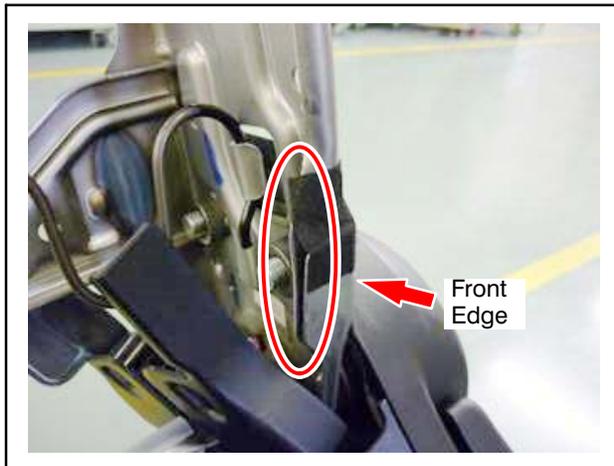

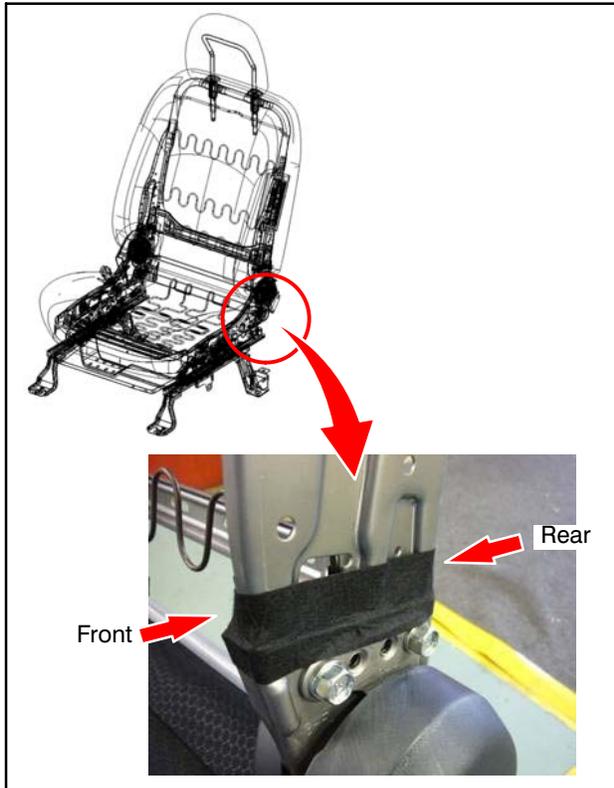

When removing and replacing certain front seat components on Outlander Sport/RVR vehicles a tape kit should be provided with the following front seat parts (ASA-CAPS PNC numbers included for reference):

- Front Seat Adjuster:  
75604R, 75602L, and 75608L.
- Front Seat Cushion Assembly:  
75004AR and 75004AL.
- Front Seat Back Assembly:  
75001AR and 75001AL.

If additional tape is required, p/n 6979A320 may be obtained. This application may be used on both driver and passenger front seats.

Apply the felt tape as follows.

1. Clean off any oil before applying tape.
2. Apply tape from the front edge in the side frame to the rear edge of the frame as shown. Make sure tape is firmly adhered to the frame.

### **GROUP 52B – Supplemental Restraint System**

**✓ DTC B223D OR B1558 FOUND IN SRS-ECU MEMORY** — 2012-17 i-MiEV, 2008-16 Lancer, 2009-16 Lancer Sportback, 2008-15 Lancer Evolution, 2014-17 Mirage, 2017 Mirage G4, 2007-16 Outlander, 2011-16 Outlander Sport/RVR.

The subject DTCs are set when the Occupant Classification Module (OCM) communicates a fault to the SRS-ECU. If you find either B223D or B1558 in SRS-ECU memory, the Service Manual will tell you to check for OCM DTCs.

As the code that identifies what you diagnosed and repaired, record the OCM DTC in the "DTC" field on the "Labor" page when submitting a warranty claim. Knowing the root cause of a fault, identified in this case by the OCM DTC, helps MMNA and MMC with their investigations, which helps them quickly develop countermeasures when needed.

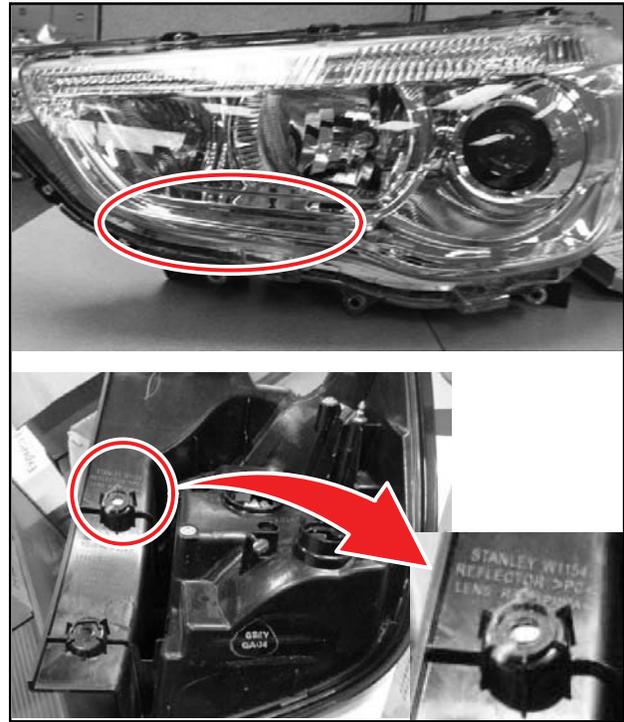

**CLOCK SPRING NOISE** — 2013-15 Outlander Sport/RVR.

The investigation on clock spring noise when turning the steering wheel as identified in Tech Talk articles 211-52B-001 (August 2014) and 216-52B-001 (February 2015) has concluded. If you encounter this condition, please refer to TSB-16-37-001 for repair information.

## GROUP 54 – Chassis Electrical

### ✓ AFTER-MARKET HEAD LAMPS / TAIL LAMPS — 2013-15 Outlander Sport/RVR.

MMNA Warranty is experiencing an unusually high return of after-market head lamps and tail lamps. “Stanley Corporation” is inscribed on original Mitsubishi (OEM) parts. The inscription is located on the lower front lens of the head lamp, and on the rear mounting surface of the tail lamp. Any other manufacturer markings indicate an after-market part that cannot be repaired under warranty. Returned after-market parts that were improperly claimed will be debited to the dealer.

---

## GROUP 00 – General: TINs Released on New MUT-III SE Scan Tool Software

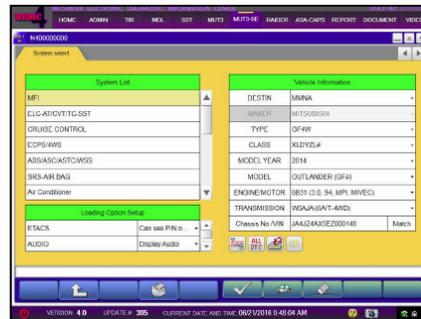

*NOTE: The following TINs were released to dealers to introduce the new MUT-III SE software and explain the functionality of this new version at your dealership. The second TIN provides useful tips for technicians.*

*These TINs can also be found on MDL: service / service tech resources / TSBs & Recalls by Model / TSB List (98-Present) / TSB List - 2016. (Technical Information Notices are listed at the bottom, Sort by TSB Number.)*

### TIN-16-00-002: MUT-III SE SCAN TOOL SOFTWARE — All models.

TIN-16-00-002 was emailed to all dealers on July 29, 2016 and states:

“Mitsubishi will launch our latest scan tool software version, MUT-III SE (Second Edition) on August 1, 2016. SE provides many advantages over MUT-III - including automatic VIN reading and faster processing speed - increasing your technician efficiency! SE is included on your MEDIC4 computer (Toughbook® or Toughpad®) on its own tab and used to diagnose certain past and present as well as all future vehicle systems.

The majority of diagnosis will now be conducted using MUT-III SE with full software implementation expected in the near future.

- The **RAIDER** scan tool remains unchanged and accessed on its own tab in MEDIC4.
- **ECU Reprogramming** continues to be performed with MUT-III for the foreseeable future.
- Oscilloscope and multi-meter functions are still supported with MUT-III and the VCI.

Refer to the attached documents which illustrate unique circumstances where MUT-III will be used instead of MUT-III SE. To provide your technicians ready access to this information in a format suitable for the shop environment, laminated copies of the usage and PS charts have been mailed to the dealership service manager.

MUT-III SE will assist your dealership in fulfilling our "Customer First" philosophy and enable your technicians to fix customer vehicles right the first time and on time."

MUT-III and VCI Usage Chart				
VEHICLE	PLATFORM	LAUNCH	END	MUT-III Version
3000GT	R24	1990	1999	MUT-III + VCI-Lite

**Questions and Answers**

Q: How do I start MUT-III SE?  
A: Confirm neither MUT-III nor RAIDER scan tools are running. Touch the MUT3-SE tab in MEDIC4 to start MUT-III SE.

Q: After I exit MUT-III SE, a blank screen remains displayed. What do I do now?  
A: Touch the MEDIC4 HOME tab to continue. Once the HOME screen is displayed, any MEDIC4 function can be selected.

Q: After I exit MUT-III, how long does it take before I see the MEDIC4 HOME screen?  
A: Wait for the MEDIC4 HOME screen to automatically display in about 30 seconds.

Q: When I open a diagnosis function within MUT-III SE, it displays that function on a new tab. Can I switch between these tabs at will?  
A: Yes

Q: I remember a Job Aid was available for MUT-III to remind me of icon/button functions. Is there a similar Job Aid for MUT-III SE?  
A: No, but if the mouse cursor is hovered over the icon/button, a screen tip is displayed with its definition. If a mouse is not connected to the "Toughpad", press and hold the icon/button until the screen tip is displayed then slide your finger away from the icon without removing your finger from the screen. Doing this prevents activating the function when only the definition is desired.

Q: How will I know which systems cannot be diagnosed with MUT-III?  
A: MUT-III SE should be used as the primary scan tool for all Mitsubishi vehicles (except RAIDER). Systems that require MUT-III to diagnose will be greyed-out on the System Select screen. (See EXAMPLE 1 on page 6.)

Q: How will I know which systems to diagnose with MUT-III SE?  
A: If MUT-III is connected to a vehicle which requires MUT-III SE, a dialog box appears alerting the technician to switch scan tools. (See EXAMPLE 2 on page 6.) Be certain to select the cancel button in the dialog box, not the check mark. If the check mark is accidentally selected, the computer may lock up requiring MEDIC4 to be restarted.

Q: Am I able to use the MUT-III oscilloscope and multi-meter with MUT-III SE?  
A: No. If these tools are needed, use MUT-III and the VCI.

Q: I can't change the numeric MIN and MAX values while using the Data List function in MUT-III SE.  
A: This will be corrected in a future enhancement of MUT-III SE.

Q: Where is the All DTC check? With MUT-III it was located in Special Function.  
A: All DTC check, CAN Bus check, ECU Reprogramming, and Special Function are small icons located below the VIN on the System Select screen in MUT-III SE.

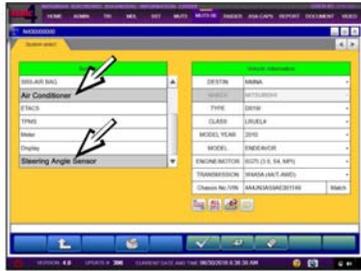

Q: Why did a recent TSB tell me to use MUT-III to reprogram an ECU instead of MUT-III SE?  
A: Currently, ECU re-flashes will be performed with MUT-III only.

Q: Why is the All DTC icon on the System Select screen sometimes greyed-out?  
A: When connected to certain vehicles, MUT-III SE displays the Loading Option Setup menu located beneath the Systems List. If the All DTC icon is greyed-out, not all selections have been completed in the Loading Option Setup menu. Scroll down to ensure all selections are made.

Q: Can I continue to use MUT-III only?  
A: No. Late model vehicles will require MUT-III SE.

5

## MUT-III SE and MUT-III Screen Displays

**EXAMPLE 1:**  
In this example, MUT-III SE is connected to a 2010 Endeavor. Systems diagnosed with MUT-III (Air Conditioner and Steering Angle Sensor, for example) are greyed-out on the MUT-III SE System List. If diagnosing one of these systems, the technician should close MUT-III SE completely and use MUT-III to continue.

**EXAMPLE 2:**  
If diagnosis requires MUT-III SE but MUT-III is used instead, a dialog box alerts the technician to exit MUT-III completely and use MUT-III SE.

Touch the X (cancel button) to clear the dialog box.

**NOTE: MUT-III SE, MUT-III, and RAIDER cannot run at the same time. Technicians must fully exit one scan tool before starting another.**

### Loading Option Setup

Due to an ETACS supplier change, technicians must confirm they can see the ETACS P/N laser etched on the ETACS assembly when completing the Loading Option Setup menu for the following vehicles. See pages 7-11 for details.

- 2008-2017 Lancer
- 2009-2017 Lancer Sportback (Canada only)
- 2009-2015 Lancer Evolution
- 2011-2017 Outlander Sport/RVR
- 2007-2013 Outlander
- 2014-2016 Outlander

This applies to replacement ETACS assemblies as well as original equipment parts.

6

## CHASSIS ELECTRICAL ETACS

### ETACS

M154500100418

#### DIAGNOSIS FUNCTION

##### HOW TO READ DIAGNOSIS CODE

Refer to GROUP 00 – How to use troubleshooting/inspection service point – Diagnosis function .

##### HOW TO ERASE DIAGNOSIS CODE

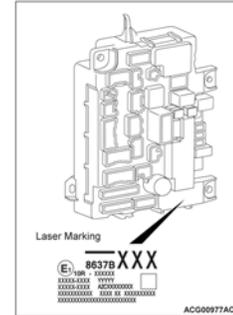

Refer to GROUP 00 – How to use troubleshooting/inspection service points – Diagnosis function .

##### Precautions on system select screen

Before using the diagnosis function for ETACS, observe the steps below on "System Select" screen:

1. Select "ETACS."

2. When you activate "ETACS" in "Loading Option Setup", you can select "Can see P/N on ECU body" or "Can't see P/N on ECU body." If the laser marking is visible, select "Can see P/N on ECU body." If not, select "Can't see P/N on ECU body."
3. Confirm with the OK button to proceed to a diagnosis function screen.

7

## LOCAL INTERCONNECT NETWORK (LIN) LOCAL INTERCONNECT NETWORK (LIN) DIAGNOSIS

### LOCAL INTERCONNECT NETWORK (LIN) DIAGNOSIS DIAGNOSIS FUNCTION

#### HOW TO READ DIAGNOSIS CODE

Refer to GROUP 00 – How to use troubleshooting/inspection service point – Diagnosis function .

#### HOW TO ERASE DIAGNOSIS CODE

Refer to GROUP 00 – How to use troubleshooting/inspection service points – Diagnosis function .

#### Precautions on system select screen

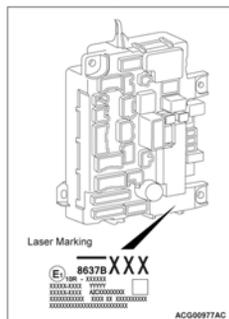

Before using the diagnosis function for LIN, observe the steps below on "System Select" screen:

1. Select "LIN."

#### CAUTION

When you select a wrong item, you cannot obtain a proper result. A part number (laser marking) must be visible in the area shown on the ETACS-ECU.

2. When you activate "LIN" in "Loading Option Setup", you can select "Can see P/N on ECU body" or "Can't see P/N on ECU body." If the laser marking is visible, select "Can see P/N on ECU body." If not, select "Can't see P/N on ECU body."
3. Confirm with the OK button to proceed to a diagnosis function screen.

8

## WHEEL AND TYRE TYRE PRESSURE MONITORING SYSTEM (TPMS) DIAGNOSIS

### TYRE PRESSURE MONITORING SYSTEM (TPMS) DIAGNOSIS

#### DIAGNOSIS FUNCTION

##### HOW TO READ DIAGNOSIS CODE

Refer to GROUP 00 – Diagnosis function .

##### HOW TO ERASE DIAGNOSIS CODE

Refer to GROUP 00 – Diagnosis function .

#### Precautions on system select screen

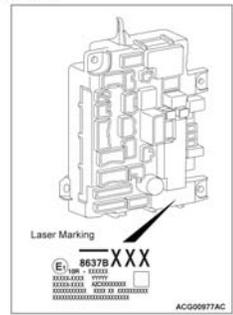

Before using the diagnosis function for TPMS, observe the steps below on "System Select" screen:

1. Select "TPMS."

#### CAUTION

When you select a wrong item, you cannot obtain a proper result. A part number (laser marking) must be visible in the area shown on the ETACS-ECU.

2. When you activate "TPMS" in "Loading Option Setup", you can select "w/o KOS (Can see P/N)" or "w/o KOS (Cannot see P/N)." If the laser marking is visible, select "w/o KOS (Can see P/N)." If not, select "w/o KOS (Cannot see P/N)."
3. Confirm with the OK button to proceed to a diagnosis function screen.

9

**BODY**  
KEYLESS ENTRY SYSTEM <Vehicles without keyless operation system>

## KEYLESS ENTRY SYSTEM <Vehicles without keyless operation system>

**DIAGNOSIS FUNCTION** M1428001600023

**HOW TO READ DIAGNOSIS CODE**  
Refer to GROUP 00 – How to use troubleshooting/inspection service point –Diagnosis function .

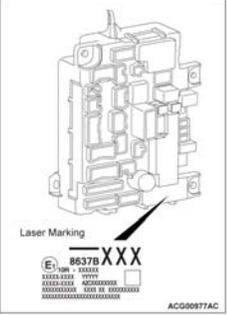

**HOW TO ERASE DIAGNOSIS CODE**  
Refer to GROUP 00 – How to use troubleshooting/inspection service points – Diagnosis function .

**Precautions on system select screen**  
Before using the diagnosis function for the keyless entry system, observe the steps below on "System Select" screen:

1. Select "KOS/IMMO/Keyless."

**CAUTION**  
When you select a wrong item, you cannot obtain a proper result.  
A part number (laser marking) must be visible in the area shown on the ETACS-ECU.

2. When you activate "KOS/IMMO/Keyless" in "Loading Option Setup", you can select "Keyless (Can see P/N)" or "Keyless (Cannot see P/N)." If the laser marking is visible, select "Keyless (Can see P/N)." If not, select "Keyless (Cannot see P/N)."

3. Confirm with the OK button to proceed to a diagnosis function screen.

**CHASSIS ELECTRICAL**  
IMMOBILIZER SYSTEM <Vehicles without KOS>

## IMMOBILIZER SYSTEM <Vehicles without KOS>

**DIAGNOSIS FUNCTION** M1541100000277

**HOW TO READ DIAGNOSIS CODE**  
Refer to GROUP 00 – How to use troubleshooting/inspection service point –Diagnosis function .

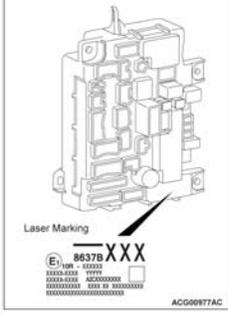

**HOW TO ERASE DIAGNOSIS CODE**  
Refer to GROUP 00 – How to use troubleshooting/inspection service points – Diagnosis function .

**Precautions on system select screen**  
Before using the diagnosis function for the immobilizer system, observe the steps below on "System Select" screen:

1. Select "KOS/IMMO/Keyless."

**CAUTION**  
When you select a wrong item, you cannot obtain a proper result.  
A part number (laser marking) must be visible in the area shown on the ETACS-ECU.

2. When you activate "KOS/IMMO/Keyless" in "Loading Option Setup", you can select "Keyless (Can see P/N)" or "Keyless (Cannot see P/N)." If the laser marking is visible, select "Keyless (Can see P/N)." If not, select "Keyless (Cannot see P/N)."

3. Confirm with the OK button to proceed to a diagnosis function screen.

11

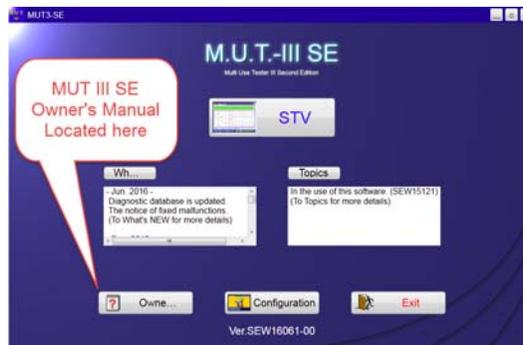

**TIN-16-00-003: MUT-III SE USEFUL HINTS, TIPS, AND PRECAUTIONS** — All models.

TIN-16-00-003 was emailed to all dealers on September 9, 2016 and states:

“Mitsubishi launched the MUT-III SE (Second Edition) on August 1, 2016. This TIN will provide some useful hints, tips, and precautions when using the various functions on the MUT-III SE.

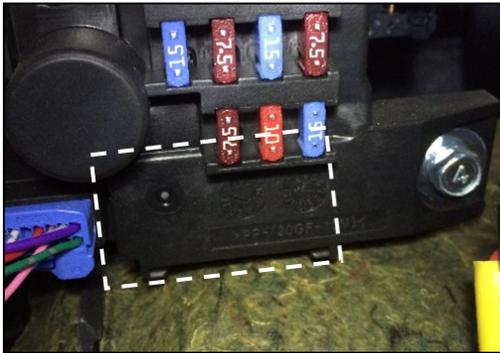

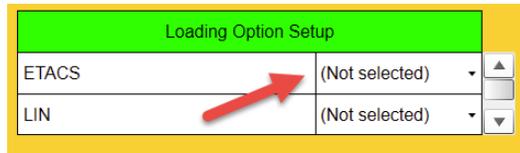

**Helpful Quick Start Tips:**

1. Always return to the MUT-III SE home screen prior to working on the next vehicle in order to prevent screen errors.
2. The MUT-III SE Owner’s Manual is located on the MUT-III SE home screen (click on the lower left button to open the manual). This same Manual is available on the Techline home screen “How to” button.
  - Additional information on using MUT-III SE is available with these publications – TIN-16-00-002 and Tech Talk volume 222 (released in July 2016).

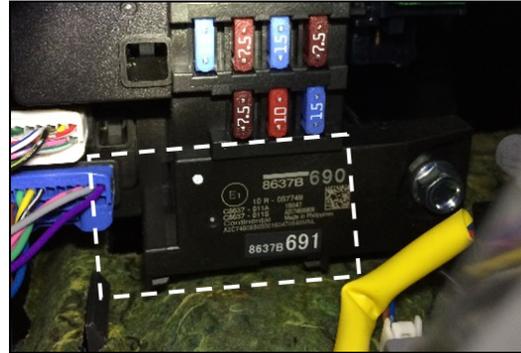

3. ETACS identification in the Loading Option Setup box is required when working on the following vehicle systems. Select “Can’t see P/N” or “Can see P/N” before proceeding.

- ETACs replacement and coding
- TPMS registration
- KEYLESS registration
- LIN system diagnosis

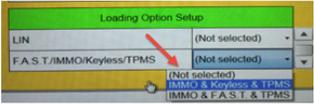

Stamped P/N (select “Can’t see P/N”)

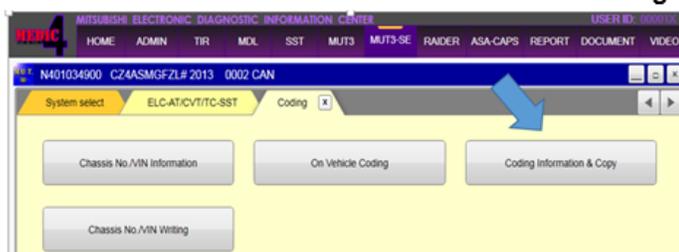

Laser Etched P/N (select “Can see P/N”)

4. Make sure you do **NOT** have MUT-III or Raider scan tool open at the same time MUT-III SE is open. Fully exit MUT-III or Raider STV prior to starting MUT-III SE.
5. On 2012 Outlander Sport/RVR and other vehicles equipped with Remote Start that are experiencing KOS programming issues: try unplugging the Mitsubishi Remote Start module and then VIN write to the KOS ECU.”

Quick Reference Guide - When to use MUT-III SE vs MUT-III		
Scan Tool	Procedure	Notes / Exceptions
<b>MUT-III SE</b> with Tablet and VCI Lite only	ETACS, SRS, PCM, TCM, ABS, CVT ECU coding (not reflashes or reprogramming) *	* Coding is not necessary on Galant, Eclipse, Eclipse Spyder, and Endeavor when ECUs are replaced. Only VIN writing is necessary (key registration needed when ETACS or PCM are replaced)
	RKE and KOS key registration 	Must select key system type in the Loading Option Box, use the scroll down arrow to find the selection.  *Not necessary on Galant, Eclipse, Eclipse Spyder and Endeavor.
	When attempting to enter the key registration password, the keypad is missing (when using the tablet)	Touch the upper left hand corner of the screen to reveal the virtual keyboard. Use keyboard to enter the password.
	OPT screen shows up during coding 	The OPT screen may be caused by the following: <ul style="list-style-type: none"> <li>• The copy or download                              coded file has not been                              performed.</li> <li>• The VIN of coding file                              does not match the                              vehicle being coded.</li> <li>• Coding file erased                              during full MEDIC                              update.</li> </ul>

Quick Reference Guide - When to use MUT-III SE vs MUT-III		
Scan Tool	Procedure	Notes / Exceptions
<b>MUT-III</b> with Toughbook (laptop) and VCI or VCI Lite	All ECU reprogramming / reflashes	PCM, TCM, SST (except Raider)
	Used when communicating with certain systems on Galant, Eclipse, Eclipse Spyder, Endeavor, and older model vehicles.	Refer to the application chart in TIN-16-00-002 and Tech Talk volume 222 or the laminated application chart sent with the paper Tech Talk copies to the dealer's service department for more information.
Twin Clutch SST Transmission Procedures		
<b>MUT-III</b> with Toughbook (laptop) and VCI or VCI Lite	Used for Mechatronics reprogramming (for example: when reflashing a 2008 EVO SST to a 2009 for teach-in purposes)	Applies to both EVO and Ralliart SST
<b>MUT-III SE</b> with Tablet and VCI Lite only	Used for Coding and SST Teach-In	Applies to both EVO and Ralliart SST

### MUT-III SE Screen for SST Transmission Coding

Drive Recording		
Scan Tool	Procedure	Notes / Exceptions
<b>MUT-III SE</b> with Tablet and VCI Lite only	Drive recordings are now performed within each of the individual vehicle systems.	
	Saving a drive recording to a USB memory can be done during the data display of the drive recording. Select file then save it to the removable drive.	Click on the blue arrows to go to the SAVE button after the USB device inserted into the USB port. 

## GROUP 60 – Recalls

**TIN-16-SR-003-C: CROSS MEMBER CORROSION SAFETY RECALL CAMPAIGN - “REMEDY AVAILABLE” CUSTOMER LETTERS** — Certain 2002 – 2007 Lancer, 2004 Lancer Sportback, 2003 – 2006 Lancer Evolution, 2003 – 2006 Outlander, and 2007 – 2013 V6 Outlander..

TIN-16-SR-003-C was recently sent to dealers and states:

“Customer letters for the Cross Member Corrosion Safety Recall Campaign are being mailed this week to 2,500 owners, informing them that remedy parts are now available. To help MMNA better understand potential parts demand, only 2,500 “remedy available” letters are being sent at this time. If one of these customers contacts your dealership after receiving this letter, please perform the procedures outlined in SR-16-003 on the affected vehicle.

Owners who were not mailed the “remedy available” letters but believe that their vehicle’s cross member exhibits excessive corrosion may still bring their vehicle into an Authorized Mitsubishi Dealership for inspection. If a customer presents their vehicle for inspection, please follow the inspection procedures outlined in SR-16-003.

If you encounter a vehicle which has excessive cross member corrosion, but is not covered under this campaign (i.e., never registered in a salt belt state), contact your DPSM for further directions. As a reminder, MMNA would like to better understand the severity of the cross member corrosion on vehicles requiring cross member replacement. Therefore, all cross member replacement recall

claims must include photos of vehicle cross members inspected and found to exhibit perforation(s), and those photos must be posted to the Photos Required Condition (PRC) system in the “cross member” category. The photos must be of the cross member still installed on the vehicle, and must clearly show the perforation or the results of the punch test (step 4 of the inspection procedure outlined in Safety Recall Bulletin SR-16-003) indicating the need for replacement, along with other areas of the cross member that exhibit corrosion.

Dealers must review the Warranty Superscreen to confirm if any vehicles in their new or used vehicle inventories are affected, and conduct this campaign prior to delivering them. When checking for applicability of this campaign (C1609R), please check for and complete any other open campaigns. Always obtain the customer’s approval before completing a campaign on a customer owned vehicle.”

**IMPORTANT**

Affected new or used inventory vehicles must be repaired before the vehicle is delivered. Dealers must check their inventory vehicles’ VINs on the Warranty Superscreen to verify whether the vehicle is involved in this recall campaign. It is a violation of Federal law for a dealer to deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by the notification under a sale or lease until the defect or noncompliance is remedied.

**ATIN-16-SR-008-A: HID HEADLAMP HORIZONTAL ADJUSTMENT LOCKING CLIPS NOT SECURED - SAFETY RECALL CAMPAIGN** — 2017 Mirage (hatchback) with HID headlamps.

ATIN-16-SR-008-A was recently sent to dealers and states:

“A non-compliance recall campaign will be released today for certain 2017 Mirage (hatchback) with HID headlamps built between October 28, 2015 and August 4, 2016. Do not deliver any affected 2017 Mirage (hatchback) vehicles with HID headlamps and built between October 28, 2015 and August 4, 2016 until this recall has been performed. The Recall Bulletin outlining the repair procedure will be available today on MEDIC and MDL.

The High Intensity Discharge (HID) headlamps allow for horizontal adjustment during the vehicle assembly process. After assembly, horizontal adjustment locking clips are secured so that no further adjustments can be made. However, HID headlamps on certain 2017 Mirage vehicles were inadvertently shipped without the horizontal adjustment locking clips being secured. This is a non-compliance with FMVSS 108. Without the horizontal adjustment locking clip being secured, the headlight can be adjusted to either reduce the driver’s visibility or blind oncoming vehicles. Both conditions can increase the risk of a crash.

Dealers are requested to inspect the HID headlamp adjustment locking clips to ensure that they have been secured. Any locking clip(s) not secured must have photos taken and posted to Photos Required Condition (PRC), and be corrected.

Notification letters will be sent to owners of affected vehicles, requesting they contact their local Authorized Mitsubishi dealership to schedule an appointment to have this recall performed.

Affected new vehicle inventory VINs can be reviewed on the Mitsubishi Dealer Link in the Most Recent: Open Campaign List available under the service section of “e-reports.” Dealers must review the Warranty Superscreen to confirm if any vehicles in their new or used vehicle inventories are affected, and conduct this campaign prior to delivering them. When checking for applicability of this campaign (C1610M), please check for and complete any other open campaigns. Always obtain the customer’s approval before completing a campaign on a customer owned vehicle.”

**IMPORTANT**

Affected new or used inventory vehicles must be repaired before the vehicle is delivered. Dealers must check their inventory vehicles’ VINs on the Warranty Superscreen to verify whether the vehicle is involved in this recall campaign. It is a violation of Federal law for a dealer to deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by the notification under a sale or lease until the defect or noncompliance is remedied.

# Training News

## Technical Training Schedule October 2016 – November 2016

Always check MDL for schedule updates. Since Mobile Training does not appear on the calendars below, contact your District Parts & Service Manager for information about Mobile Training in your area.

### EASTERN ZONE

# TECHLINE

(800) 446-6064

**HOURS OF OPERATION:**  
Monday — Friday 6:30 am – 3:30 pm  
Pacific Time

Techline is closed every THURSDAY  
9:30 – 10:30 A.M for a staff meeting.

# MEDIC Information

MEDIC Hotline (800) 846-7575

**HOURS OF OPERATION:**  
Monday — Friday 7:00 am – 4:00 pm  
Pacific Time

MEDIC Hotline will assist with MEDIC &  
Scan Tool hardware or software issues.

# Bulletin Review

Since Tech Talk 223, the following  
bulletins have been released.

## 2016 Technical Service Bulletins, Safety Recalls, & Service Campaigns

Date Posted	Publication Number	Publication Title	Applicable Models
9/19/2016	SR-16-008	HID Headlamp Horizontal Adjustment Locking Clips Not Secured - Safety Recall Campaign	2017 Mirage
10/4/2016	TSB-16-51-001	Wind Noise from Door Mirror	2015-16 Lancer, Lancer Sportback, & 2015 Lancer Evolution
10/12/2016	TSB-16-51-002	Liftgate Garnish Removal & Installation Procedure - SMR	2016 Outlander
10/12/2016	TSB-16-54-004	Tail Light Removal & Installation Procedure - SMR	2016 Outlander

# TIN/ATIN Review

Since Tech Talk 223, the following  
TINs/ATINs have been released.

## 2016 Technical Information Notices, Advance Technical Information Notices

Date Posted	Publication Number	Publication Title	Applicable Models
9/14/2016	TIN-16-SR-003-C	Cross Member Corrosion Safety Recall Campaign - "Remedy Available" Customer Letters	2002-07 Lancer, 2003-06 Lancer Evolution, 2004 Lancer Sportback, 2003-13 Outlander
9/19/2016	ATIN-16-SR-008-A	HID Headlamp Horizontal Adjustment Locking Clips Not Secured - Safety Recall Campaign	2017 Mirage
10/3/2016	TIN-16-36-001	DTCs Set in Electric Parking Brake ECU	2017 Outlander w/F.A.S.T. Key
