

2010-2013 Mazda3

CONNECTOR 0918-501 AND 0920-403 SERVICE CAUTION

When performing electrical repairs on the instrument panel harness (e.g. 2010 MAZDA3 DASHBOARD UPPER PANEL STICKY SURFACE SSP99), take caution when re-connecting connectors 0918-501 and 0920-403. Both connectors are identical and near the same location. If connected incorrectly, multiple electrical malfunctions will occur (e.g. hazard lights stay on).
