	Passenger's Wiper Blade (Right)	8V1955426	1
	Battery (Amp. Req. Vary)	000915105*	1
	Battery (Amp. Req. Vary)	000915105*	1

*VIN required

Resetting the indicator

Your authorized Audi dealer or authorized Audi Service Facility will reset the service interval display after performing service.

If you perform an oil change yourself to the Audi specifications, you must reset the service interval display.

To reset the display, select the **MENU** button > **Car** > **Systems*** control button > **Service & control** > **Service intervals** > **Reset oil change interval**.

Note

- Only reset the oil change indicator if the oil was changed.
- Following the service intervals is critical to maintaining the service life and value of your vehicle, especially the engine. Even if the mileage on the vehicle is low, do not exceed the time for the next service.
- Calculating the time to the next oil change is interrupted when the vehicle battery is disconnected. If the vehicle is not driven for a long period of time, check the maintenance schedule so that you can follow the maintenance intervals.

For current fluid capacity charts, they can be found on ServiceNet under the Maintenance tab.
