	Battery (Amp. Req. Vary)	000915105*	1
	Battery (Amp. Req. Vary)	000915105*	1

***VIN Required**

Resetting the indicator

Your authorized Audi dealer or authorized Audi Service Facility will reset the corresponding service interval display after performing service.

If you have changed the oil yourself, you must reset the oil change interval.

To reset the display, select the **CAR** function button > **(Car) Systems*** control button > **Servicing & checks** > **Service intervals** > turn the control knob down to **Reset oil change interval** and press the control knob.

Note

- Only reset the oil change indicator if the oil was changed.
- Following the service intervals is critical to maintaining the service life and value of your vehicle, especially the engine. Even if the mileage on the vehicle is low, do not exceed the time for the next service.
- Calculating the time to the next oil change is interrupted when the vehicle battery is disconnected. If the vehicle is not driven for a long period of time, check the maintenance schedule so that you can follow the maintenance intervals.

For current fluid capacity charts, they can be found on ServiceNet under the Maintenance tab.
