Subject: Update on TDI Emissions Compliance Issue

Dear Dealer Partners,

In April, U.S. District Court Judge Charles Breyer, who presides over the Multi-District Litigation proceedings in San Francisco, announced that U.S. government agencies, regulators and the Plaintiffs' Steering Committee had reached certain agreements in principle to resolve 2.0L TDI emissions matters. The Court had ordered the parties to file those proposed agreements on June 21.

We are writing to let you know that at the request of Settlement Master Robert S. Mueller III, given the highly technical nature of the proposed settlements in these complex proceedings, the Court has given the parties an additional week until 12pm PST on June 28 to submit the associated documents to the Court.

Discussions regarding the agreements in principle remain confidential. As a result, we are not in a position to provide further details. As soon as we can provide you with additional information, we will share it with you.

Thank you for all you do for Audi and for Audi owners. We appreciate your effort, your dedication and your patience during this time.

Thank you,

Audi Dealer Communications

Audi of America, 2200 Ferdinand Porsche Drive, Herndon, VA 20171
