

# Service Bulletin

## PRELIMINARY INFORMATION

**Subject:** Rattle From the Turbocharger on Cold Start

**Models:** 2014 - 2016 Cadillac CTS-V Sport and XTS  
Equipped with LF3 Twin Turbocharged Engine

*This PI was superseded to add reference to TechLink article. Please discard PIP5319B.*

The following diagnosis might be helpful if the vehicle exhibits the symptom(s) described in this PI.

### Condition/Concern

You may have one of the above vehicles come into your dealership with the concern of a rattle from the turbocharger when cold.

This will be a cold start noise at idle, not to be confused with the noise when revving the engine referred to in PI1234.

Please verify that the noise is from the turbocharger before going forward.

### Recommendation/Instructions

If you have verified the rattle noise when cold is from the turbocharger, and the noise is unforced, there is a revised part available for this concern.

**Note:** There are sound bites of the 2 different types of noise in the January 29, 2016 Version of TechLink available from the SI home page.

The new part has a revised spring for the wastegate to limit movement when cold.

The new part numbers are 12666538 and 12666539 for CTS-V Sport and 12666540 for the XTS.

If the vehicle already has these part numbers installed, DO NOT REPLACE AGAIN.

### Parts Information

Part Number	Description	Quantity
12666538	Turbo charger Assembly - LH CTS	1
12666539	Turbo charger Assembly - RH CTS	1
12666540	Turbo Charger Assembly (RH/LH) XTS	2

### Warranty Information

For vehicles repaired under warranty use:

Labor Operation	Description	Labor Time
4068290	Turbocharger Replacement	Use Published Labor Operation Time

Please follow this diagnostic or repair process thoroughly and complete each step. If the condition exhibited is resolved without completing every step, the remaining steps do not need to be performed.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
