2016 Tiguan, Jetta, Passat, Beetle, Beetle Convertible, CC -
MIB2 equipped Models with Composition Color Radio -
Volume Increases On its Own or Reception is Clipping With
No Antenna Faults Stored

July 1, 2016: Update to Information.

This will occur when driving and only when listening to AM/FM radio stations. This results from the antennae signals “bouncing” off of buildings or other structures, amplifying the radio signal. This is a normal characteristic. As such, no repairs should be made.

Composition Color Identification.
