2015-2016 Golf, GTI, eGolf, Golf Sportwagen, Jetta, Passat, Beetle, Tiguan – “The Selected Language is Not Available” Displayed When Backup Camera is Activated. MIB2 Infotainment Systems

The radio screen may display “The Selected Language is Not Available” when the backup camera is in use. This is due to a language setting in the infotainment system. From the Setup menu in the MIB2 infotainment system, select “Language” and then select “English (US)”. Please note that the selected language icon will appear greyed out when selected.
