

This bulletin provides the procedure for upgrading the base audio system software of some 2017MY Forte (YDm) vehicles, produced from May 15, 2016 to August 12, 2016, to improve Bluetooth[®] pairing.

YDm AUDIO(A) Pairing SW USB Drive

GDS - Audio Update Module (AUM)

* NOTICE

A Service Action is a repair program without customer notification that is performed during the warranty period. Any dealer requesting to perform this repair outside the warranty period will require DPSM approval.

Repair status for a VIN is provided on WebDCS (Service \rightarrow Warranty Coverage \rightarrow Warranty Coverage Inquiry \rightarrow Campaign Information). Not completed Recall / Service Action reports are available on WebDCS (Consumer Affairs \rightarrow Not Completed Recall \rightarrow Recall VIN \rightarrow Select Report), which includes a list of affected vehicles.

This issue number is <u>SA239</u>.

***** NOTICE

A fully charged battery is necessary before audio head unit upgrade can take place. It is recommended that the Midtronics GR8-1299 system be used, in ECU mode, during charging. Do <u>NOT</u> connect any other battery charger to the vehicle during audio head unit upgrade.

File Under: <Electrical>

Service Procedure:

***** NOTICE

- Delete all paired phones from the system and delete the head unit from all phones. If you do not delete phones, the phone(s) will still show and act as paired, but performance or functionality issues may occur. Anytime a software update is performed to either a paired phone or the system, the pairing should be deleted from both phone and system and then paired again after update.
- <u>An AUM upgrade may NOT be available for this TSB at the time of launch. In</u> the meantime, perform the upgrade using the USB upgrade sticks.
- 1. Start the vehicle or connect the Midtronics GR8-1299 charger.
- 2. Record the customer's radio presets before performing the upgrade.
- Prior to performing the procedure, check to ensure that the current software version matches the version shown in the table below. NOTE: to check S/W version, follow steps 7~10 on Pages 3~4.

Model	Current Version			
Forte (YDm)	V1.00 USA			

 If performing the update using the GDS AUM, refer to TSB SST 032 or click on User's Guide > GDS AUM on the GDS main screen, as shown below, and follow the on-screen instructions.

- 5. Turn the head unit ON and wait until booting is finished (approx. 10 seconds) before proceeding to the next step.
- If performing the update using a USB stick, obtain the correct YDm Audio (A) Pairing SW USB Drive (yellow) from your Service Manager and insert it in the vehicle's USB port. NOTE: Make sure to allow for the sound file to play for one second before proceeding to the next step.

Images shown are for demonstration only purposes and will vary by model.

7. Turn the head unit OFF.

***** NOTICE

Do NOT turn the vehicle ignition OFF while the update is in progress.

8. Press and hold preset button "1" and then preset button "4" and continue to hold both for five (5) seconds.

***** NOTICE

If the software version screen is displayed when pressing and holding the preset buttons "1" and "4", restart the procedure from step 7.

9. Immediately after releasing preset buttons "1" and "4", press preset button "1" four (4) times in a row quickly within half a second each.

***** NOTICE

Do not remove the USB thumb drive, AUM connector or turn the radio OFF while the update is in progress.

10. If the S/W version screen displays correctly, press the **SETUP (A)** button.

SERVICE ACTION: BASE AUDIO SYSTEM UPGRADE (SA239) SUBJECT:

11. Press preset button "1" to display the firmware upgrade menu.

- Β scan setu MENU FOLDER 2 RDM I APT
- 12. Once the Firmware upgrade menu is displayed, press preset button "4" to update MICOM (B).

13. The upgrade will begin and system will display the progress on the screen. Once the upgrade is complete, the head unit will automatically reset and then turn off.

***** NOTICE

The update will take approximately three (3) minutes to complete.

SUBJECT: SERVICE ACTION: BASE AUDIO SYSTEM UPGRADE (SA239)

14. With the head unit off, press preset buttons "1" and "6" at the same time for two seconds or more and verify that the software update is successful. If update is not successful, restart the procedure from step 5.

Model	Updated Version			
Forte (YDm)	V1.01 USA			

- 15. Reprogram the customer's radio presets if necessary.
- 16. Verify proper system operation by obtaining the customer's phone(s) and pairing it (them) with the system. If the customer's phone is not available for pairing, inform the customer that the phone must be paired to the head unit.
