Text

DESCRIPTION:

*Added structure week end point.

A rattling noise may occur while closing the front door with the window in down position. Only vehicles with non-laminated glass can be affected.

SERVICE:

Add a felt tape P/N 30788314 (max 2 mm thickness) on the front door glass run channel according to attached service instruction.

VEHICLE REPORT:

Yes, please submit a Vehicle Report if the service solution described in this TJ has no effect. Use concern area "Vehicle Report" and sub concern area "Support not needed", use function group 8455.

Orientation view

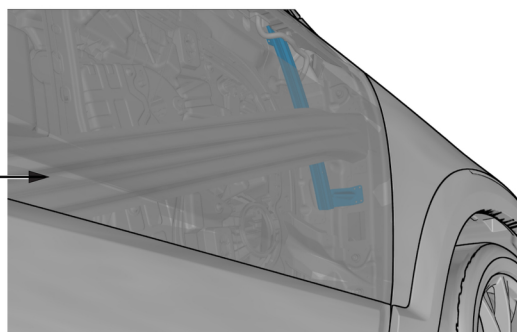

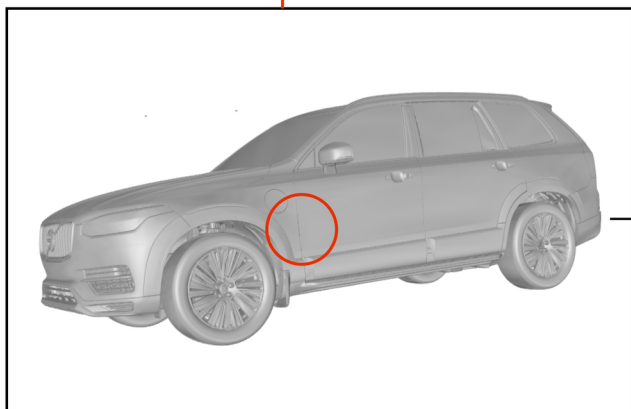

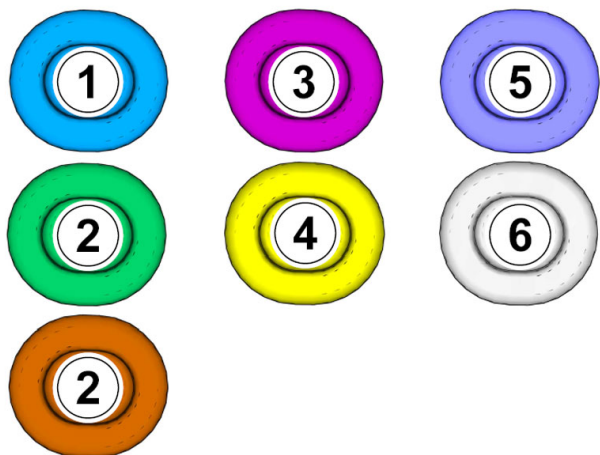

Image philosophy

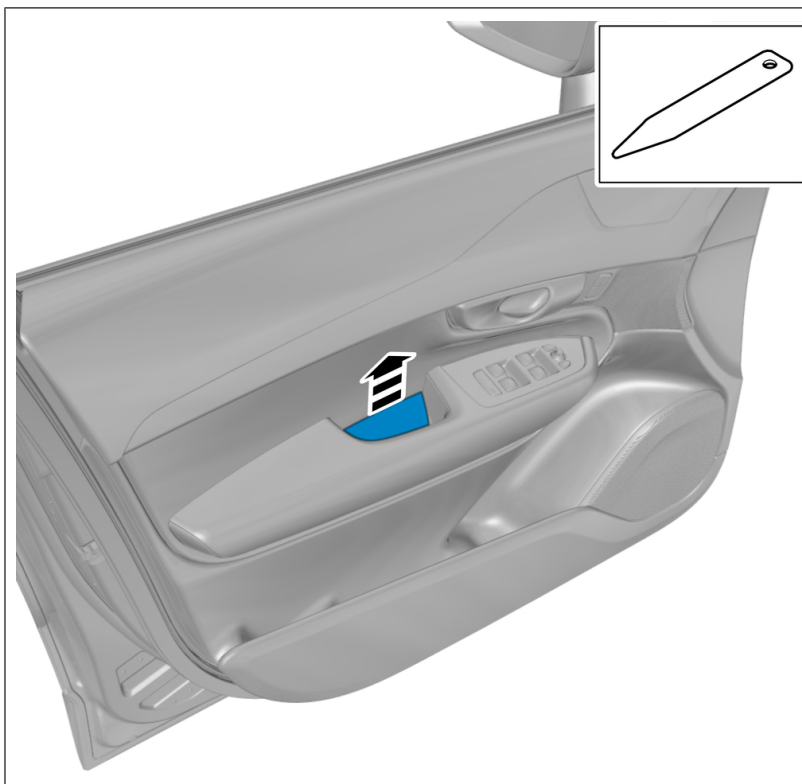

Note! This colour chart displays (in colour print and electronic version) the importance of the different colours used in the images of the method steps.

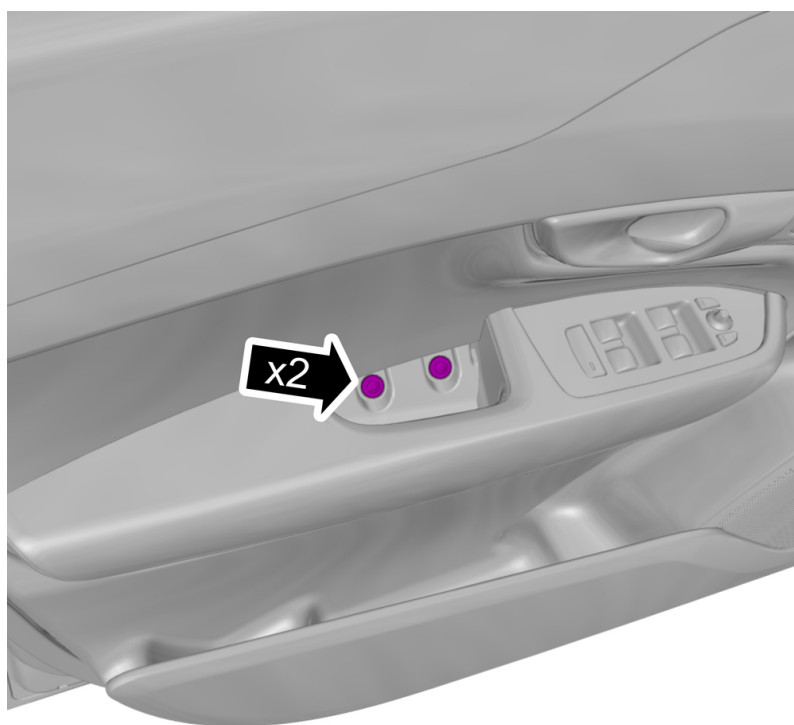

- 1 . Used for focused component, the component with which you will do something.
- 2 . Used as extra colors when you need to show or differentiate additional parts.
- 3 . Used for attachments that are to be removed/installed. May be screws, clips, connectors, etc.
- 4 . Used when the component is not fully removed from the vehicle but only hung to the side.
- 5 . Used for standard tools and special tools.
- 6 . Used as background color for vehicle components.

Removal

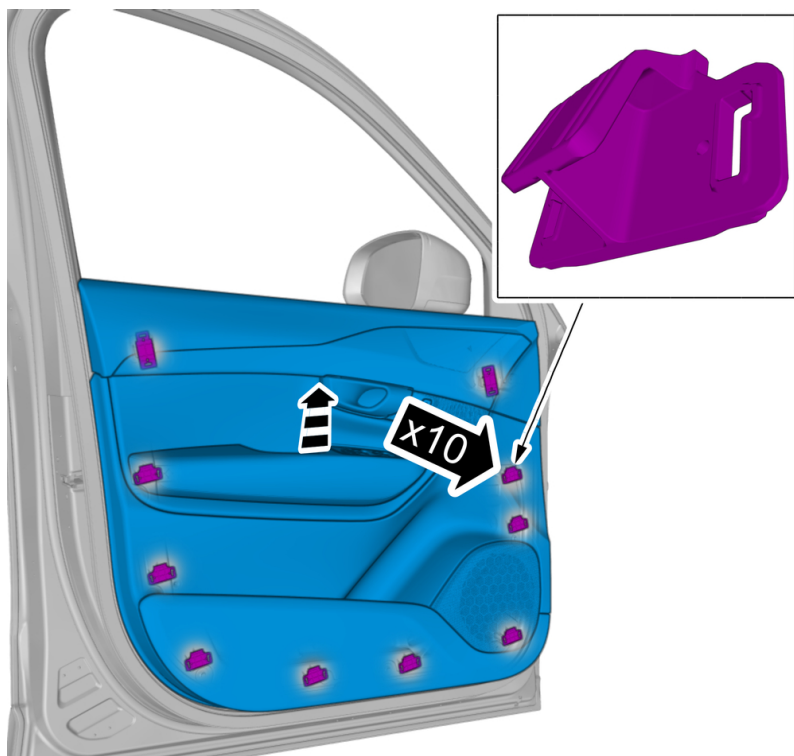

Note! Removal steps in this procedure may contain installation details.

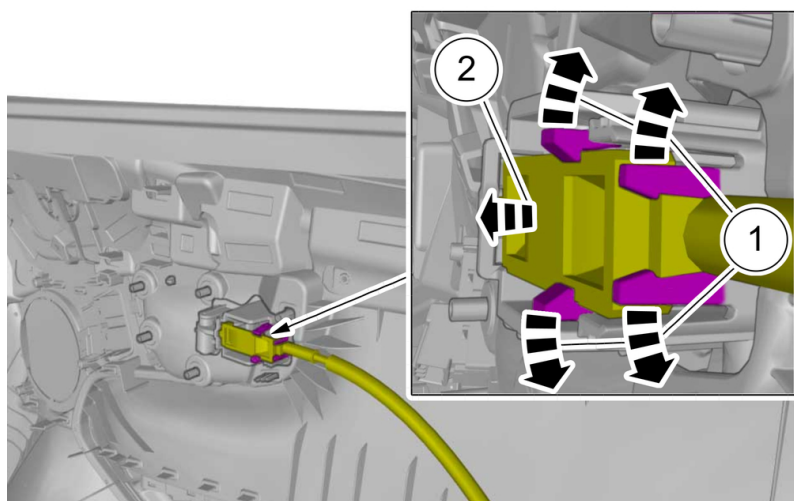

On both sides.
Remove the panel.

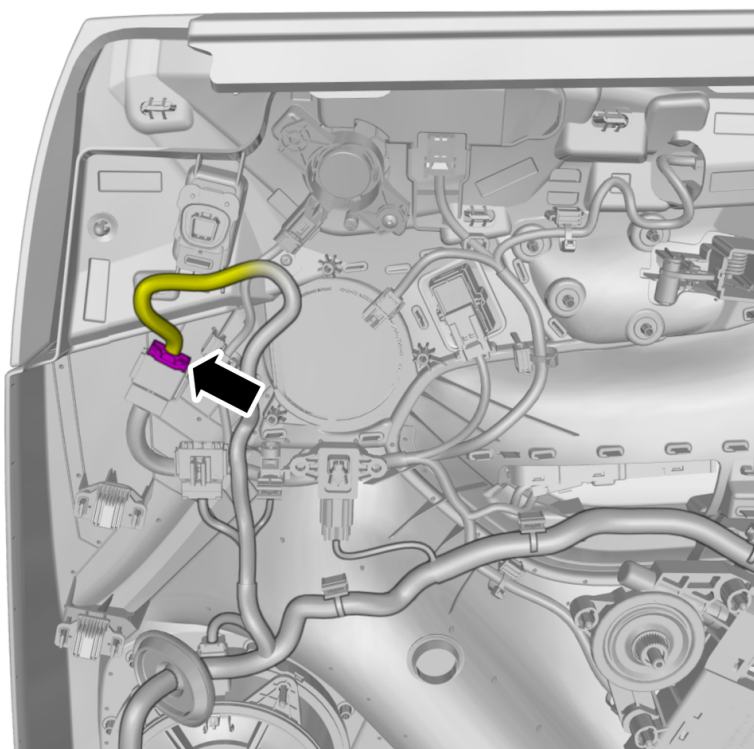

Remove the screws.
