TECHNICAL

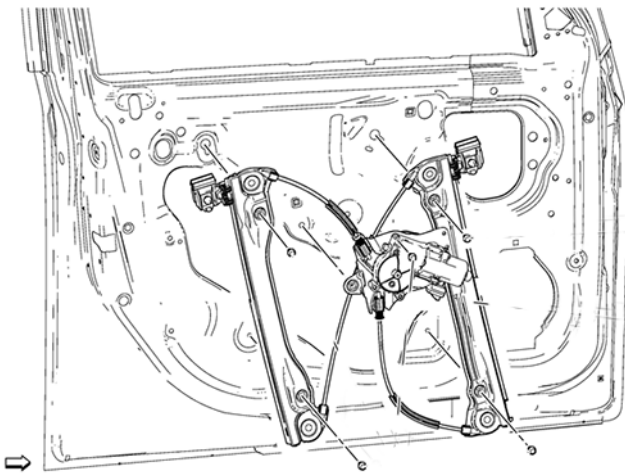

Subject: Radio Continues to Play, Retained Accessory Power (RAP) Will Not Cancel After Driver Door is Opened, DTCs U1530 or U1534 Present

Brand:	Model:	Model Year:		Date Breakpoint:		Engine:	Transmission:
		from	to	from	to		
Buick	Cascade	2016	2017	SOP 2016	November 4, 2016	All	All

Involved Region or Country	North America
Condition	Some customers may comment that when parking and turning off the vehicle, the radio continues to play after the driver door is opened. Technicians may find DTCs U1530 or U1534 present.
Cause	The cause of the condition may be a power window motor control circuit board that may have a defect which doesn't allow communication to the BCM for window indexing. For proper operation, the BCM needs to see the indexing signal to know that the door is open, and cancel RAP.

Correction

Follow SI diagnostics to verify condition of no window indexing communication to BCM.

For vehicles exhibiting the condition, replace the driver side door power window regulator/motor assembly. Refer to *Front Side Door Window Regulator Replacement* in SI.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
