Date: Feb 18, 2016

Subject: Audi Brand Diagnostic Content Version 2.7.3 Release

To: U.S, Puerto Rico Dealers

This document conveys General
Information.

A new Audi Brand Diagnostic Content Version 2.7.3 is on the ODIS server and available to update all VAS testers at your dealership.

Take note that the version numbers transition from the current version 2.7.0 to 2.7.3. The reason for this is that version 2.7.1 had some issues with parts of the test and it was cancelled. In order to send a software update to the field with some important diagnosis test plans, versions 2.7.1 and 2.7.2 were combined, and given the new version number 2.7.3.

The new software update will now recognize the year 2017 on the MY2017 Q7 NF vehicles.

Be sure to complete the updates for all testers no later than Friday, February 26, as there are some very important diagnostic functions on this version.

If you experience any issues or concerns while updating to these latest versions, please contact the ODIS Diagnostic Support Group at 888.896.1298.

Thank you.
