

Technical Service Bulletin

90 Audi virtual cockpit - speed warning does not work

90 16 64 2043734/1 March 22, 2016.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment
Q7	2017	000001 - 007430	Audi virtual cockpit

Condition

After a threshold for the speed warning in the MMI is set and then turned off, one or both of the following conditions occurs:

- The speed warning cannot be deactivated.
- The speed warning is displayed in km/h and not mph.

Technical Background

Software deviation.

Production Solution

Optimized software in production.

Service

UNote:

The software of the Audi virtual cockpit must be updated with an SD card (part number 8S0906961H), which should be ordered in advance.

SVM Update Instructions

- 1. Follow all instructions in TSB 2011732: 00 Software Version Management (SVM), operating instructions.
- 2. Update the instrument cluster control module, J285 (address word 17), using the SVM action code as listed in the table below, if necessary.

UNote:

To perform the update with the SD card, use ODIS Guided Fault Finding to run "SVM - Code input". Follow the instructions outlined by the test plan. The test plan will display a prompt to insert the SD card into the MIB system. The update will be performed with the data on the SD card, and a progress meter will be displayed on the MMI screen. Note that the tester must remain hardwired to the vehicle during the update.
