**SUBJECT:** Tonneau Cover Design Change

**Introduction:**

This Service Information bulletin announces a design change to the retractable portion of the tonneau cover made to address customer concerns of the cover retracting on its own while driving on rough roads. The shape and length (an additional 1mm) of the stoppers on both ends of the brace which secure the cover when in use have been changed as shown in the illustration below.

**Production Change Information:**

The new tonneau cover was incorporated into FHI production during mid-April 2016. There has also been a running change made during port processing. Use the illustration above to identify the new part by the change in stopper shape.
