Date:

Buyer's Name:

Buyer's Signature:

Dealer's Name:

Dealer Representative's Signature:

Application & models may change without notice.

Winter tires available for VW vehicles may have a maximum speed rating that is lower than the potential maximum speed of the vehicle. Never drive VW vehicles at speeds that exceed the maximum speed rating of the tires with which the vehicles is equipped. Always obey posted speed limits.

A NOTE ABOUT HIGH PERFORMANCE TIRES: These tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy or icy weather conditions. If you drive under those circumstances, you should equip your vehicle with all season or winter tires, which offer better traction under those conditions. We suggest you use the recommended winter or all season tires specified for your car or its equivalent. These high-performance tires also have a lower aspect ratio that aids performance and handling; however, in order to avoid tire, rim or vehicle damage, it is important that the inflation pressure is regularly checked and maintained at recommended levels. Please also remember in making your selection that, while these tires deliver responsive handling, they may ride less comfortably and make more noise than other choices. Finally, these tires may wear more quickly than other choices. For further information on all these topics, please consult the owner's manual, your local dealer or call 1-800-374-8389.

Print this original Tire Chain Restriction Disclosure for additional copies.

Volkswagen
