Service Update 16159 TCM On-board Noncompliance

Reference Number: N162063270

Release Date: December 2016 Revision: 00

Attention: This service update includes vehicles in dealer inventory and customer vehicles that return to the dealership for any reason. This bulletin will expire at the end of the involved vehicle's New Vehicle Limited Warranty period.

		Model Year		Model Year			
Make	Model	From	То	RPO	Description		
Buick	LaCrosse	2017	2017	LGX	3.6 L Engine		
				MRC	8-Speed Transmission		

Involved vehicles are marked "open" on the Investigate Vehicle History screen in GM Global Warranty Management system. This site should always be checked to confirm vehicle involvement prior to beginning any required inspections and/or repairs.

Condition	On certain 2017 model year Buick LaCrosse vehicles with an 8-speed transmission (MRC), under certain				
	downhill driving conditions, these vehicles may inappropriately remain in a mode of delayed upshifts that				
	can only be exited on an ignition key cycle or gear selector shift to neutral.				
Correction	Reprogram the transmission control module.				

Parts

No parts are required for this procedure.

Service Procedure

Note: Carefully read and follow the instructions below.

- Do NOT attempt to order the calibration number from GM Customer Care and Aftersales. The calibration
 numbers required for this service procedure are programmed into control modules via a Multiple Diagnostic
 Interface (MDI) with the calibration update. If you cannot access the calibration, call the Techline Customer
 Support Center and it will be provided.
- Do NOT program a control module unless directed to by a service procedure or a service bulletin. If the control
 module is not properly configured with the correct calibration software, the control module will not control all of
 the vehicle features properly.
- Ensure the programming tool is equipped with the latest software and is securely connected to the data link connector. If there is an interruption during programming, programming failure or control module damage may occur.
- Stable battery voltage is critical during programming. Any fluctuation, spiking, over voltage or loss of voltage will
 interrupt programming. When required, install the *EL-49642* SPS Programming Support Tool to maintain system
 voltage. If not available, connect a fully charged 12 V jumper or booster pack disconnected from the AC voltage
 supply. DO NOT connect a battery charger.
- Turn OFF or disable systems that may put a load on the vehicles battery such as; interior lights, exterior lights (including daytime running lights), HVAC, radio, etc.
- During the programming procedure, follow the SPS prompts for the correct ignition switch position.
- Clear DTCs after programming is complete. Clearing powertrain DTCs will set the Inspection/Maintenance (I/M) system status indicators to NO.
- 1. Install EL-49642 SPS programming support tool.
- 2. Access the Service Programming System (SPS) and follow the on-screen instructions.
- 3. In SPS select K71 Transmission Control Module and follow the on-screen instructions.
- 4. Clear DTCs after completing the programming procedure.

Service Update 16159 – TCM On-board Noncompliance

5. Disconnect EL-49642 SPS programming support tool.

Dealer Responsibility

Whenever a vehicle subject to this service update enters your vehicle inventory, or is in your facility for service in the future, and the vehicle is still covered under the New Vehicle Limited Warranty, you must take the steps necessary to be sure the service update correction has been made before selling or releasing the vehicle.

All new, used, GM Certified Used, courtesy transportation vehicles, dealer shuttle vehicles, etc. in dealers' possession and subject to this bulletin <u>must</u> be held and inspected/repaired per the service procedure of this bulletin <u>before</u> customers take possession of these vehicles. Involved vehicles must be held and not delivered to customers, dealer-traded, released to auction, used for demonstration, or any other purpose.

All GM Certified Used vehicles currently in the dealers' inventory within the Certified Pre-Owned Inventory System (CPOIS) will be de-certified and must be held and remedied per the service procedure in this bulletin. Upon submitting an accepted/paid warranty transaction in the Global Warranty Management (GWM) system, the vehicle can be re-certified for sale within the CPOIS system, or once again be used in the CTP program.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the tools, equipment, safety instructions, and know-how to do a job properly and safely. If a condition is described, <u>DO NOT</u> assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your dealer for information on whether your vehicle may benefit from the information.

We Support Voluntary Technician Certification

GLOBAL SAFETY FIELD INVESTIGATIONS DCS4277 URGENT - DISTRIBUTE IMMEDIATELY

Date: December 6, 2016

- Subject: 16159 Service Update TCM On-board Noncompliance
- Models: 2017 Buick LaCrosse Equipped with 8-Speed Transmission (MRC)
