

No. 16 TS-7  
March 28, 2016

TO: Service Locations  
FROM: Service Systems Development  
SUBJECT: Reman Diesel Particulate Filter Serial Number

**ISSUE**

Reman has released over 9,000 filters with serial numbers starting with 124R; see Example 1. When installing a new or Reman DPF, input the filter serial number into DiagnosticLink® to reset the ash accumulator; see example 3. DiagnosticLink will not accept any letters within the DPF serial number input field.

Example 1

Example 2

**REQUIRED ACTION**

If you receive a Reman filter with an “R” in the serial number (example 1), use a zero as its replacement to input the serial number in DiagnosticLink.

If you receive a Reman filter with an “R” at the beginning of the serial number (example 2), please disregard the “R” and start with the 124 when entering the serial number.

Please provide the two serial numbers for the aftertreatment system now installed on the vehicle.

Serial number should be of the format 124xxxxxxxxxx.

Serial number should be of the format 124xxxxxxxxxx.
