## Condition

37 16 03 November 30, 2016 2046013

**Automatic Transmission Fluid (ATF) Cooler, Mandatory Replacement, When Replacing 09G AQ250 Gen III Gearbox**

## Technical Background

Gen III versions of the 09G AQ250 transmission do not come from the factory with an ATF oil cooler.

## Production Solution

Information only.

# Technical Bulletin

---

## Service

When replacing a 09G AQ250 Gen III gearbox for any reason, the oil cooler must not be removed from the transmission. A new oil cooler with mounting hardware must be ordered with the replacement gearbox. Not replacing the ATF oil cooler can cause failure of the new transmission and lead to contamination of the old transmission, due to the oil cooler being removed.

### Note:

**DO NOT remove the ATF oil cooler from the transmission at any time unless absolutely necessary for diagnosis. Once diagnosis is complete, and if the transmission is to be replaced, the cooler must be reinstalled to ensure the transmission internals are sealed from outside debris.**

## Warranty

Information only.

## Required Parts and Tools

Information only.

## Additional Information

**All part and service references provided in this Technical Bulletin are subject to change and/or removal. Always check with your Parts Dept. and Repair Manuals for the latest information.**
