*Replace only if original screw is damaged.
**ONLY needed if cable replacement is necessary.

Repair Procedure

1. Confirm operation of the interior fuel door release lever. If lever is inoperative and it does NOT feel as if there is any tension on the lever when operating, then follow the steps outlined below to diagnose the repair. If tension can be felt when pulling the fuel door release lever, then this bulletin does NOT apply.

2. Confirm fuel door release lever housing is secured properly to the vehicle.
   Is the fuel door release lever housing secured properly to the vehicle?
   - YES — Continue to step 3.
   - NO — This bulletin does NOT apply. Continue diagnosis using the applicable Repair Manual.

3. Disassemble the housing from the vehicle for inspection. There is one 10mm bolt and a tab holding the mechanism in place.

   **Figure 1.**

   1. Body Tab
   2. 10 mm Bolt
Repair Procedure (Continued)

4. During disassembly confirm if the fuel door release cable is loose or disengaged from the fuel door release lever housing. You can remove the luggage door and fuel lid lock cables for inspection.

5. If the cable is loose or disengaged from the housing, inspect the housing for damage. Confirm if the mounting tabs that retain the cable are broken or damaged.

6. If the housing is damaged, replace the fuel lid release lever housing assembly and continue to step 7. If the housing is NOT damaged, do NOT continue to the next step, this bulletin does NOT apply to the vehicle being repaired.

7. Prior to reassembling, inspect the fuel door release cable for damage. If cable appears to be in good condition, then the cable assembly does NOT need to be replaced. If the cable is damaged, replace the cable assembly.

8. Disconnect the cable from the negative (–) battery terminal.
9. Remove the front seat assembly LH.
10. Remove the rear seat cushion assembly.
11. Remove the rear seat cushion lock hook (lock hooks MUST NOT be reused).
12. Remove the rear side seatback assembly LH.
13. Remove the front door scuff plate LH.
Camry Fuel Lid Door Lever Inoperative

Repair Procedure (Continued)

14. Disconnect the front door opening trim weatherstrip.
15. Remove the rear door scuff plate LH.
16. Disconnect the rear door opening trim weatherstrip LH.
17. Remove the lap belt outer anchor cover.
18. Disconnect the front seat outer belt assembly LH.
19. Remove the center pillar lower garnish LH.
20. Remove the luggage compartment door cover.
21. Remove the luggage compartment door hinge cover LH.
22. Remove the spare wheel cover assembly.
23. Remove the rear floor finish plate.
24. Remove the luggage compartment front trim cover (HV ONLY).
25. Remove the No. 1 luggage compartment trim hook.
26. Remove the luggage compartment inner trim cover LH.
27. Remove the fuel lid lock open lever sub-assembly.
28. Remove the fuel lid lock control cable sub-assembly.
   A. Disengage the 2 clamps.
   B. Using a clip remover, disengage the clamp and disconnect the wire harness.
