Reason for block	

Complaint:

When an Apple device is connected via the Media Interface and a phone call is received, music playback is stopped.

When the call is terminated, the music playback remains stopped and must be restarted manually.

Note: The complaint only occurs in combination with Apple devices.

Cause:

Timing behavior of iOS software.

Remedy:

Apple has been informed and is working on a solution.

Please do not replace any parts.

Symptoms
Communication/information / Entertainment / Media interface (UMI/UCI) / Audio output faulty
