Date	06-15-2016
Validity	447.603 447.703
Reason for change	Step 1 added under Remedy. Operation item added.
Reason for block	

Complaint:

Seat belt (front and/or rear) does not retract correctly.

Cause:

Dirt deposits on the seat belt guide due to a soiled seat belt.

Attachments	
File	Description
1.jpg	Seat belt guide dirty. The dirt visible here can stop the seat belt rolling up properly.

Remedy:

1. Clean dirt deposits off the seat belt using a dry cloth or a soft brush.

2. Check guide slot of belt guide on B-pillars or passenger seats for soiling, and clean if necessary.

Important: When cleaning the seat belt guide bracket, observe cleaning instructions for seat belts in the owner's manual! Use MB plastic cleaner. Only treat the belt guide, not the seat belt!!

3. If the cleaning does not bring about any improvement, replace the seat belt.

Symptoms
Body / Safety system / Seat belt / Seat belt / Belt strap rolls up poorly
