2015-2017	GS450H	2016-2017	LX570

CONDITION

After the DCM has been replaced, Lexus Enform Remote is unable to remote unlock/lock the doors or remote start the vehicle.

RECOMMENDATIONS

The DCM must be registered to the immobilizer system in order to perform these functions.

After a DCM has been replaced and DCM activation has been performed, register the DCM to the immobilizer system by referring to Procedure “H” and Procedure “I” under Immobilizer System registration.

Immobilizer System registration can be found in the Repair Manual on TIS by navigating to: Vehicle Interior/Theft Deterrent / Keyless Entry/Immobilizer System/Registration
