Important

Subject: **Important ISPI Next Update Info for ver. 3.59.xx**

Important Note:

Due to a programming bug in ISTA/P 3.59.0 it is very important to install ISTA/P 3.59.0 and directly after install ISTA/P 3.59.1. Do not only update to 3.59.0. Both versions have been released today for download.

To update to ISTA/P 3.59.1 directly after the update to 3.59.0 dealers should deactivate the automatic update in the tray application. Uncheck the box "Install future updates automatically" in the tab "Service Mode" and run both updates manually by clicking the file name in your download folder. After updating to 3.59.1 you can then activate the automatic update again.

Please see the attached PDF for more information on the Automatic Update feature.
