Text

**DESCRIPTION:**

XC90 vehicles built before structure week 201536 have a function called 'Slam Lock'.

This function allows the driver to lock the vehicle by: Opening the driver's door, pressing the lock button on the interior door panel, then closing the door (see attached video [Slam Lock.wmv](#)).

This function may be useful in some situations, for example, when the driver is leaving the vehicle with their hands full and wishes to close and lock the vehicle with their foot.

The function however allows the possibility to accidentally lock the key(s) in the vehicle.

When the Slam Lock function is removed using the software below, pressing the lock button with the door open will not lock the vehicle (see attached video [Without Slam Lock.wmv](#)).

SERVICE:

Slam Lock can be removed using Software Product 31472233.

VEHICLE REPORT:

N/A

This TJ has two video files.
