

SUBJECT: Victory Motorcycles – Accessory Ape Hanger Handlebars

PURPOSE:

Some Victory Accessory Ape Hanger Handlebars (2880762, 2880763, 2880764, 2880765) have been welded incorrectly causing alignment dimple to locate bars in the wrong position upon installation. If not aligned correctly it is possible to dent the fuel tank when turning handlebars from lock to lock.

SOLUTION:

Victory has removed the alignment dimple from the Ape Hanger Handlebars. Dealers should align handlebar position based on ergonomics and switchcube location. The kit instructions below have been updated to reflect this change. Follow instructions to ensure proper fit and function.

INSTRUCTIONS:

To view the instructions follow the steps below.

1. Login to the dealer website.
2. Under the “Service and Warranty” dropdown, select **Kit Instruction Lookup**
3. Enter the part number in the related field.
4. Click on **View Instructions**
