RUBICON EXPRESS TECHNICAL UPDATE

DATE 6/30/2016

APPLICATION 07-16 Jeep JK 4 DR Only

PART NO. JK444CC, JK444NB

TECHNICAL ISSUE

RE-06.30.2016

Excess Ride Height concern for 2DR Jeep JK with JK444CC 5.5" lift Extreme Duty 4 Link Long Arm Coil Over kit: It has been reported that a 2dr JK can achieve more than 6" of lift with the above listed kits. This creates obvious concerns for a customer anticipating a lower center of gravity and minimum height increase for 35" tires.
The currently available coil over spring rates were developed to provide 4"- 5" lift for a well equipped 4 DR Unlimited.

CORRECTIVE ACTION

It is currently advised that the JK444CC and JK444NB kits are promoted for 4 DR application only. Spring rates to provide 3.5" to 4.5" lift for the 2 DR models are currently being tested and new kit numbers will be released for 2 DR application.

EXPECTED CORRECTION TIME

☐ CORRECTED. SEE CORRECTIVE ACTION (ABOVE)
☐ 14 DAYS ☐ 30 DAYS ☒ 60 DAYS ☐ 90 DAYS

REQUIRES PART NOTE IN ISIS

☒ YES ☐ NO

NOTES:

JK444CC and JK444NB are recommended for 4 DR models only. 2 DR models will achieve over 6" lift.
