

NEXT-GENERATION TELEMATICS

HINO INSIGHT 2.0 OVERVIEW

A Toyota Group Company

Telematics blends computing, communications and GPS to give you the information you need to be in control of your fleet and your business to make better, faster decisions. Built-in GPS positioning will monitor and provides real-time data on vehicle location. Direct interface to engine computer systems provides detailed data on vehicle health and driver performance. Intelligent telematics systems have the ability to collect historical vehicle data and translate it into information that you can use to maximize your fleet's efficiency.

Hino INSIGHT 2.0 powered by Telogis is a dynamic cloud-based location and telematics solution that helps you save money, increase safety and optimize your operations. The powerful analytics and connected intelligence delivered by Telogis will help you raise the bar on customer service and ensure seamless compliance with government and environmental standards. INSIGHT 2.0 supplies a level of real-time and organized historical data that was previously unimaginable, allowing fleet managers – and your organization – to stay ahead of the competition.

REAL-TIME VISIBILITY

CUSTOM DASHBOARDS

The custom dashboard provides insight into vehicle and driver performance, such as PTO and idle time, fuel economy, and driver behavior. These metrics include the ability to compare the performance of your fleet against similar industry benchmarks.

REAL-TIME DIAGNOSTIC DATA

Access to Hino-specific data elements and diagnostics to meet mission-critical targets for fuel, engine health and more.

INSIGHT ALERTS

Configurable alerts provide immediate insight into key data elements to improve vehicle maintenance. Fleet owners can be alerted on several key indicators such as engine coolant over temperature, high engine RPM, loss of oil pressure, low DEF tank level and poor DEF quality.

INDUSTRY BENCHMARKING AND ANALYTICS

Compare the performance of an individual vehicle or a fleet against industry benchmarks from fleets in similar industries or vocations across different geographical regions.

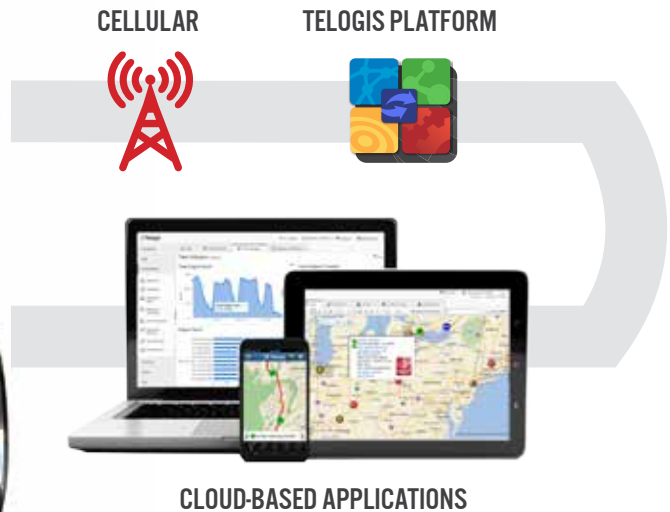

FACTORY-FIT

INSIGHT 2.0 is standard equipment for all Hybrids (195h and 195h DC), and comes with a prepaid subscription, so all you have to do is activate. For all diesel vehicles, INSIGHT 2.0 is available as a factory option or installed by your local dealer.

HOW DOES IT WORK?

INSIGHT 2.0 blends real-time truck diagnostics and driver behavior with GPS to communicate to the Telogis platform and provide intelligent telematics

BUILT-IN INTELLIGENCE

VISIBILITY INTO YOUR DRIVERS' WORK DAYS

- Vehicle location
- Utilization (driving, PTO, idle)
- Time on site
- Miles driven

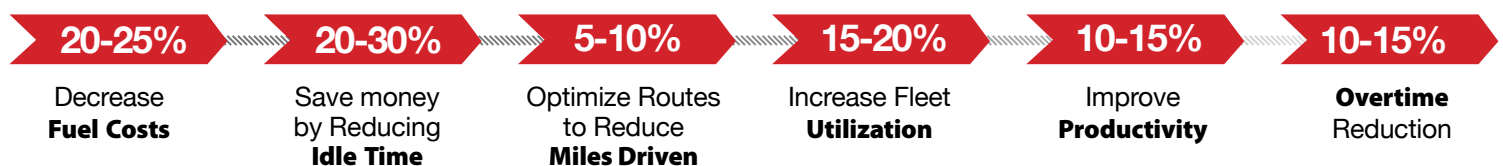

VEHICLE HEALTH AND FUEL CONSUMPTION

- Fuel economy
- Engine over-revving conditions
- DEF tank level
- DEF tank quality
- Engine coolant temperature

DRIVER BEHAVIOR

- Excessive speeding
- Harsh acceleration
- Hard braking

MAXIMIZE YOUR UPTIME

Source: "Benefits of Fleet Management Systems," Frost & Sullivan, 2012

Standard Features

- Receive updated data every 2 minutes
- Command center mapping
- Animated vehicle history trails
- Insight real-time alerts via email
- Fleet overview dashboard of key metrics such as vehicle performance and driver behavior
- Benchmark comparisons to comparable fleets
- Search for vehicle, location and more
- 50+ analytic reports, that can be automated, such as:
 - IFTA state miles reporting
 - Fuel Economy
 - DEF Level and Quality
 - Utilization
- Landmarks and GeoFences
- Fleet, driver and team management
- SSL capable, fully ensuring security
- Advanced large fleet reporting
- Real-time traffic data

Optional Features

- Maintenance reporting
- 2-way messaging
- Optimal routing
- Truck-specific navigation
- Satellite imagery
- Intelligent driver/skill routing
- User security levels and role based hierarchy
- Robust API integration
- Advanced enterprise dashboard
- GIS overlays, showing power lines, sewer lines etc.
- Driver scorecard
- Client self-service portal
- Historical data storage
- Speed alerts against posted speed limit
- High-speed report rate
- HOS reporting
- Driver Vehicle Inspection Reports (DVIR)
- DOT compliance
- Automated driver assignment
- Last-mile routing
- Road network feedback from over 140,000+ drivers
