Diesel Exhaust Fluid (DEF) **by** **Quality Fleet Products**

Diesel Exhaust Fluid is monitored for quality and standardized as ISO 22241 by the International Organization for Standardization (ISO), ensuring that Diesel Exhaust Fluid is a stable, non-toxic, odorless & completely safe solution.

Diesel Exhaust Fluid (DEF) is a liquid required by today's diesel engines to meet the stringent emission standards controlled by the EPA. DEF is never added to diesel fuel, it is injected directly into the exhaust stream using Selective Catalytic Reduction (SCR). It is a non-hazardous solution of approximately 32.5% urea in 67.5% de-ionized water. DEF is clear, colorless and looks exactly like water. It has a slight smell of ammonia, similar to some home cleaning agents. DEF is used in SCR technology to remove harmful NOx emissions from diesel engines.

Dealer Principals
Parts Managers
General Managers
Parts Sales

BULLETIN: PA-2016-035

DATE: 3-28-2016

EXP: N/A

Features:

- Aisin's specific formula developed by the #1 manufacturer of Japanese ATF's is engineered and designed specifically for Aisin transmissions
- Excellent flow and temperature characteristics ensure smooth engagement in any weather condition
- Optimally engineered for smooth shifting without shift shock. Fluid friction co-efficiency reduces drivetrain power loss, which enables better start and acceleration
- SCS (Slip Control System) ATF Fluid
- **ATF-OT4** is specifically engineered for GM, Hino, Isuzu, Mitsubishi and UD trucks where Type T-IV or JWS 3309 fluid is specified

Hino Trucks reserves the right to make changes, including change in price, content, description, terms, time period, etc. at any time without notice.
