Subject: Vehicle parts with Soft Touch paint finish

Please note as a result of the analysis conducted by our laboratory to investigate numerous cases of replacement due to depolymerization of the paint finish of the aforementioned parts have confirmed that the phenomenon is caused by the use of INAPPROPRIATE products to clean the interior of the vehicle.

Therefore, in addition to the instruction given in our Owner's manuals that only NEUTRAL products may be used, we can now also recommend the use of the cleaning product **LECHLER 00665 – HYDROCLEANER SLOW, Part No. 70004016**, which may be ordered directly from the Ferrari Parts Department as of May 11, 2016.

Therefore, parts with a Soft Touch paint finish must only be cleaned with the aforementioned detergent product from now on, using the cleaning cycle described as follows.

CLEANING CYCLE using LECHLER 00665 – HYDROCLEANER SLOW

1. Moisten a cotton cloth with **00665 – HYDROCLEANER SLOW** cleaning solution;
2. Wipe the parts gently by hand, only applying light pressure;
3. After, ventilate the passenger compartment for approximately 10 minutes.

Thank you for your co-operation.
