MASERATI

Subject: MY 17 M156/M157 and M161 deactivation of Ship/Logistics Mode

Description: M156/M157 and M161 deactivation of Ship/Logistics Mode

- 1) Start the vehicle and confirm if the vehicle is in "Ship Mode"
 - a. "Ship Mode" will display on bottom of Instrument Cluster Center Display

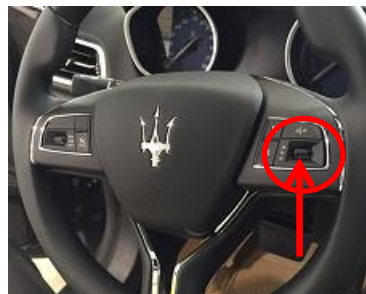

- 2) Turn the vehicle off, then press the ignition button 2 times with your foot off the brake to place the ignition in the "Run" position. All electronics should be on and Engine Off.

- 3) Place the vehicle's ignition in the RUN position; turn on the hazard lamps. The switch is located on the shifter console panel, see associated pictures.

- 4) Upon activation of the hazard lamps, push upward and hold the right side "menu toggle switch" for approximately 10 seconds.

- 5) Deactivation of Ship Mode is confirmed by the vehicle's odometer appearing in the center display of the instrument cluster. When the odometer appears, cycle the ignition "off" then wait 3-5 minutes before cycling the ignition "on" and starting the vehicle. Upon starting the vehicle, complete a functionality check of all the electrical systems/components.
