

Technical Information Bulletin

03-055

Section

Instruments/Gauges - 03

Subject

Restoring CECU Parameters

Release Date

9/16/2016

Condition

Without taking the proper steps to restore the original CECU programming, customers may lose their preset-parameters when the CECU module is replaced.

Action

INFORMATIONAL ONLY

If you are replacing an ICU or CECU, the replacement unit will now be a CECU3, which can be programmed to emulate the original control unit. Additionally, a vehicle equipped with NAMUX 2.5 software (P30-1032) or NAMUX 2 software (P30-1030) may have a CECU3 that is not functioning correctly and requires a new, replacement CECU3. In either of these conditions, the following steps can be used to update the software to P30-1030-109 while retaining the original parameter values.

Warranty

None. This TIB is for information only.

Procedure

There are three ways to restore parameters when installing a new CECU3: (See the attached procedure for detailed instructions for each option)

1. Option 1 - Restoring from Backup
2. Option 2 - Restoring from ECAT
3. Option 3 - Restoring Parameters Manually

NOTE

The vehicle's odometer cannot be reprogrammed to reflect the actual distance traveled. Federal law requires the vehicle's original mileage must be recorded on an odometer replacement label. Follow the procedure listed in [TIB 03-037](#).
