

Subject: MULTI-MODEL - WINDSHIELD WASHER FLUID CHANGE	M-Tips No.: MT-001/17
	Last Issued:

DESCRIPTION

Factory filled windshield washer fluid has been changed to an ethanol type (yellow color) instead of the conventional methanol type (blue color). This change is for European compliance. Mazda has decided to make the change for all markets.

Both types of fluids can be mixed together. In other words, the blue fluid can be added to the factory filled yellow fluid or vice versa.

	
Ethanol type (yellow)	Methanol type (blue)
Factory	Production Date Change
Japan	August 22, 2016
Mexico	November 1, 2016
