Minotour Bailment Report

We are pleased to announce that the "Minotour Bailment Report" has been restored with major upgrades and improvements. You can check on the availability of Minotour chassis.

You now have the ability to filter certain criteria for particular specifications. The fields that can be filtered are, Model Year, Wheelbase, Fuel Type, Weight, Engine Size, Color etc. Or you can look at all the available chassis.

This is not a static spread sheet, this is a live report. It will update the availability as the status of chassis change. The data you see on the report is correct at that current moment.

It is available for your review 24/7. Please take advantage of this great new tool.

The link to this report is located on the "Dealer Portal". See location below.

This new report is for viewing and informational purposes only at this time. You will still have to contact Kevin Clark (via email) to request chassis allocation to you as in the past. This part of the process is not changing.

Please note at the top of the report it states, "Report Does Not Include FORD Chassis". At this time we do not receive the Ford data in the same manner that we do from GM, therefore we cannot load their information. This is being worked on and at some point in the future we hope to include the Ford chassis data as well.
