RE: ECM Reprogramming for Engine Knocking Noise – Service Campaign
ATIN NO. ATIN-16-SC-001-A

.....

AFFECTED VEHICLES: Certain 2014 – 2015 Mirage vehicles

PURPOSE

A service campaign will be released today for ECM reprogramming on certain 2014 – 2015 Mirage vehicles. During cold start, the engine ECU may order inappropriate fuel amounts which may cause engine noise.

This campaign bulletin instructs dealers to reprogram the ECM with new software on all affected vehicles. In rare cases, if the vehicle exhibits an engine knocking noise, the engine may need to be replaced.

The Service Campaign Bulletin outlining the repair procedure will be available today on MEDIC and MDL.

NOTE

All vehicles affected by this Service Campaign are also affected by Safety Recall SR-16-001, SRS CONNECTOR CORROSION - SAFETY RECALL CAMPAIGN – however, not all vehicles affected by Safety Recall SR-16-001 are included in this Service Campaign. For vehicles affected by both service actions, to minimize any customer or dealer inconveniences, please perform both campaigns at the same time. Always get the customer’s approval before completing a campaign on customer-owned vehicles.

When checking for applicability of this campaign (C1602A), please check for and complete any other open campaigns. Always get the customer’s approval before completing a campaign on a customer-owned vehicle.

IMPORTANT

To maximize customer satisfaction with the quality of their vehicle, affected new or used inventory vehicles should be remedied before the vehicle is delivered. Dealers must check their inventory vehicles’ VINs on the Warranty Superscreen to verify whether the vehicle is involved in this service campaign.
