Dear Sir / Madam:

Utility Trailer Manufacturing Company hereby submits to NHTSA a copy of communications sent to more than one party during the month of April 2016 as required by CFR Part 579.5.

- **Field Service Bulletin: Federal Mogul Components**

- Attached includes:**

- **Field Service Department Service Bulletin # SB-08-199**

Respectfully submitted,

Joseph Vergeldedios, National Accounts Manager
Field Service Department
UTILITY TRAILER MANUFACTURING COMPANY

SERVICE BULLETIN

UTILITY TRAILER MANUFACTURING CO.

SB-08-199

Issue date: April 27, 2016

Federal Mogul Components

Federal Mogul's wheel seal is a unitized seal consisting of three major components; J-Metal, Main Component and Shield. Please refer to the picture included in this Service Bulletin to further identify the three major components.

In most cases, the seal will remain in one piece during removal. In the event the pieces become detached, it is important that all three pieces are sent to Federal Mogul for warranty analysis. Without sending all three of the major components Federal Mogul cannot conduct a proper analysis, and therefore the claim will be denied.

If you have any questions regarding the information indicated, please contact Field Service Department directly at 1.800.423.6591
