Wiring Overview

Heater harness wiring overview

OBSOLETE SUPERCEDED BY 03103213-D002EN

Procedure

1. Disconnect the **Negative (-)** battery cable(s).
2. Use an F-bit to drill a pilot hole in the LH cowl.
3. Use a 3/4" bit to enlarge hole.

Hole for battery power harness

4. Feed the heater power supply harness through cowl riser, apply sealant to harness bushing and secure.
5. Route power harness along the cowl harness, RH chassis harness and frame rail to the battery box.

Power harness secured to cowl harness to frame rail

OBSOLETE SUPERCEDED BY 03103213-D002EN

NOTICE

Keep all fasteners for installation.

6. Remove (6) screws from the dash hood and set aside.

Dash hood

7. Disconnect the auxiliary heater control switch and discard.

Auxiliary heater switch

OBSELETE SUPERCEDED BY 03103213-D002EN

8. Drill a 7/32" hole in the dash bracket.
9. Cut and strip Ground wire and crimp a ring terminal and terminal connector to each end.
10. Secure the WHITE Ground wire ring terminal to the cowl with a 1/4-20 fastener.

Relay Ground wire

11. Cut, strip and crimp a terminal connector to the RED battery harness.
12. Cut the DARK BLUE switch wire. Strip wires and crimp terminal connectors to both ends.
13. Connect RED Battery harness, both DARK BLUE heater power switch and Ground terminals to relay.

Switch wiring

14. Insert replacement switch in dash and connect harness.

Switch (top shown) and dash opening

15. Install inline fuse at battery box.
16. Connect to **Positive (+)** battery terminal.
17. Connect the **Negative (-)** battery cable(s).

Inline fuse on heater power harness

CAUTION

Secure wire harnesses a maximum of every 18".

All wire harnesses need to be free and clear from the range of motion of any moving part and MUST be prevented from falling into the range of motion of a moving part.

18. Test system operation.
19. Secure all harnesses with wire ties to the LH chassis harness, cross member and frame rails.
20. Install dash.
