

Updated Gateway Coding Will Allow 12V Battery Trickle Charging Using "Charge-o-mat" with the 12V Socket (58/14)

Information

- Document with limited validity.

This Quick Information shall remain valid until further notice.

Revision: This bulletin replaces bulletin Group 2, #58/14, dated December 1, 2014.

Model Year: **As of 2014 up to 2015**

Model Line: **Macan**

Concerns: **"Charge-o-mat" battery maintainer**

Information: Previously, the Porsche "Charge-o-Mat" battery maintainer could not be used on the Macan vehicles due to a Gateway control unit setting which would not allow maintaining/charging from the vehicle's 12V sockets. With PIWIS Tester software above 14.600, an updated coding can be written into the Gateway Control Unit which will now allow 12V battery maintaining/charging from the 12V outlets in the vehicle.

Tools: **9818 - PIWIS Tester II** with software version 14.600 (or higher) installed.

Battery Charger/Power Supply - Suitable for AGM Type batteries, recommended current rating of 70A fixed voltage 13.5V to 14.5V.

Work Procedure: Select the **'Gateway' control unit** in the control unit overview on the PIWIS Tester.

⇒ Select the **'Automatic coding'** function in the ⇒ **'Codings/adaptations'** menu and press **•F12** to confirm your selection.

⇒ The **status message "Coding in progress"** appears in the display. Do **not interrupt the process**.

The **status message "Coding has been completed successfully"** then appears.

Press **•F12** to end the process and return to the control unit overview.

Important Notice: Technical Bulletins issued by Porsche Cars North America, Inc. are intended only for use by professional automotive technicians who have attended Porsche service training courses. They are written to inform those technicians of conditions that may occur on some Porsche vehicles, or to provide information that could assist in the proper servicing of a vehicle. Porsche special tools may be necessary in order to perform certain operations identified in these bulletins. Use of tools and procedures other than those Porsche recommends in these bulletins may be detrimental to the safe operation of your vehicle, and may endanger the people working on it. Properly trained Porsche technicians have the equipment, tools, safety instructions, and know-how to do the job properly and safely. If a particular condition is described, do not assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your authorized Porsche Dealer for the latest information about whether a particular technical bulletin applies to your vehicle. Part numbers listed in these bulletins are for reference only. Always check with your authorized Porsche dealer to verify the current and correct part numbers. The work procedures updated electronically in the Porsche PIWIS diagnostic and testing device take precedence and, in the event of a discrepancy, the work procedures in the PIWIS Tester are the ones that must be followed.
