FSB 233-006, Engine Fuel Filters

(March 2016)

Engine fuel filters (part number 21380475) with week number date codes "15_33" (August 10, 2015) through "15_39" (September 27, 2015) should not be installed on an engine without first being inspected. The week number date code is marked on the outside of the filter, the number on top is the year and the number below identifies the week. Due to a manufacturing issue, fuel does not flow through the filter which results in a no-start/run condition immediately after installation.

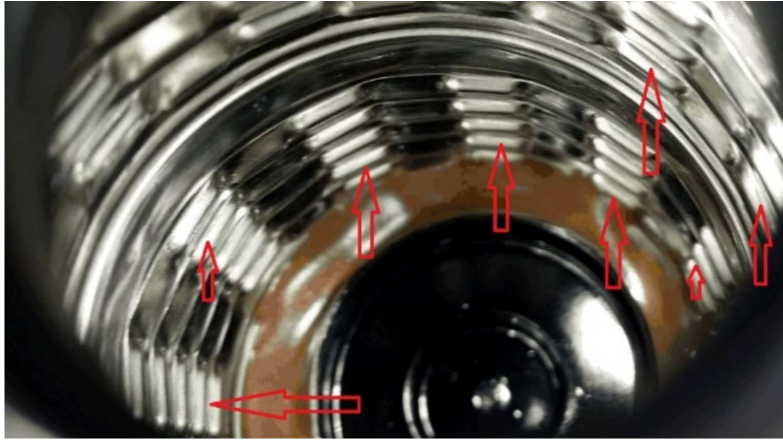

Week Number Date Code

Service personnel: Please circulate, read and initial

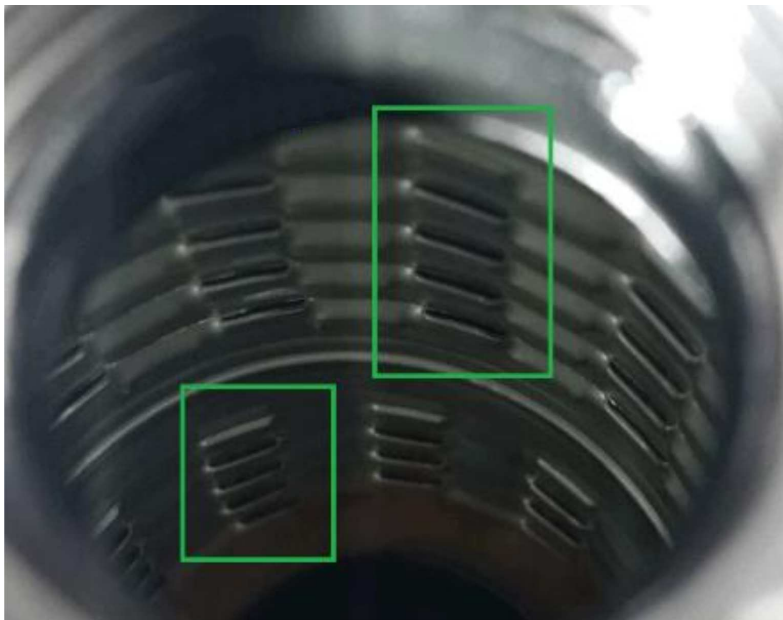

Service Manager	Warranty Administrator	Workshop Foreman	Service Technicians						

To determine if a filter can be installed on an engine, shine a flash light inside the filter to verify the holes/slits are present for fuel flow.
