	2016 Rogue (T32)	built after April 17, 2016
	2016 Murano (Z52)	built after March 31, 2016

SERVICE INFORMATION

Nissan is issuing this Technical Service Bulletin to clarify that a change has been made for the logic that controls the Occupant Classification System (OCS) and “passenger airbag indicator” (PABI), as described in the Owner’s Manual. This TSB applies only to vehicles using the 2-sensor OCS.

Those changes are:

- PABI light is ON with an empty front passenger seat.

The following table below illustrates when the PABI illuminates with the logic change.

CONDITION	DESCRIPTION	PASSENGER AIR BAG INDICATOR LIGHT	FRONT PASSENGER AIR BAG STATUS
Empty	Empty front passenger seat	ON (illuminated)	INHIBITED
Nobody/Somebody	Bag or Child or Child Restraint or Small Adult in the front passenger seat	ON (illuminated)	INHIBITED
Adult	Adult in front passenger seat	OFF (dark)	ACTIVATED

Nissan Bulletins are intended for use by qualified technicians, not 'do-it-yourselfers'. Qualified technicians are properly trained individuals who have the equipment, tools, safety instruction, and know-how to do a job properly and safely. **NOTE:** If you believe that a described condition may apply to a particular vehicle, DO NOT assume that it does. See your Nissan dealer to determine if this applies to your vehicle.
