

# Rear Seat Leg Noncompliance RECALL

Models Affected: Certain 2011 - 2017 All American Rear Engine school buses with a right-hand rear side emergency door and seat belt-ready seats.

#### **ISSUE**

The mounting of the seat over the wheelhouse in front of the right-hand rear side emergency door on certain buses with seat belt-ready seats may not meet the requirements of FMVSS 210 Seat Belt Assembly Anchorages.

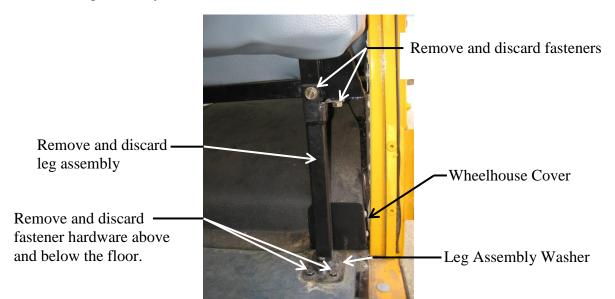

#### CORRECTIVE ACTION

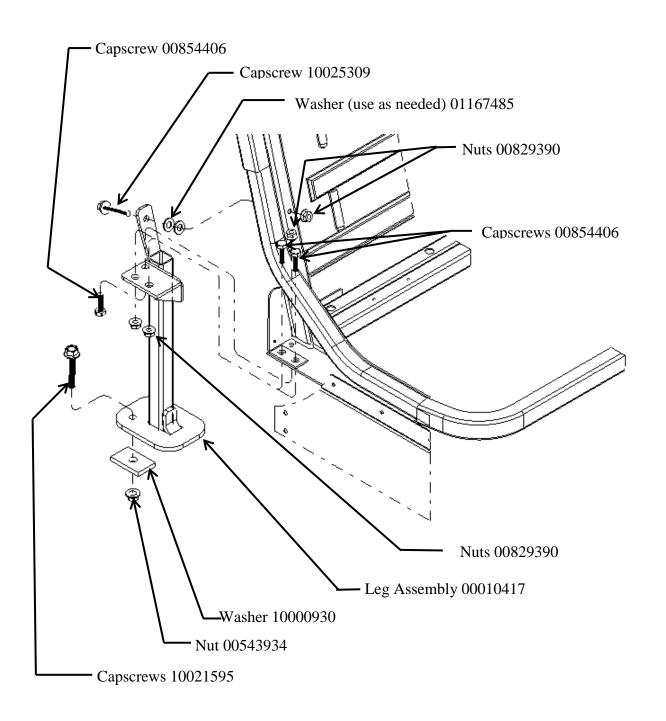

Replace the rear leg assembly on the righthand seat over the wheelhouse in front of the rear side emergency door with a new leg assembly.

### **PROCEDURE**

**WARNING:** Always follow all Federal, State, Local and Shop safety standards and use proper safety equipment, and thoroughly read and understand all instructions before performing these procedures.

- 1. Park bus on level ground, turn engine off, remove ignition key, and chock wheels.
- 2. Remove seat cushion on right-hand seat assembly in front of rear side emergency door.
- 3. Open rear side emergency door to access leg assembly for right-hand gusset/floor mounted seat.
- 4. Remove the fasteners attaching the leg assembly to the seat frame and the fasteners attaching the leg assembly to the floor. Discard all fasteners.
- 5. Remove the leg assembly and discard. Note: Leg assembly washer at the bottom of the leg may be underneath the wheelhouse cover. If necessary, tap lightly with a rubber hammer to remove leg assembly.

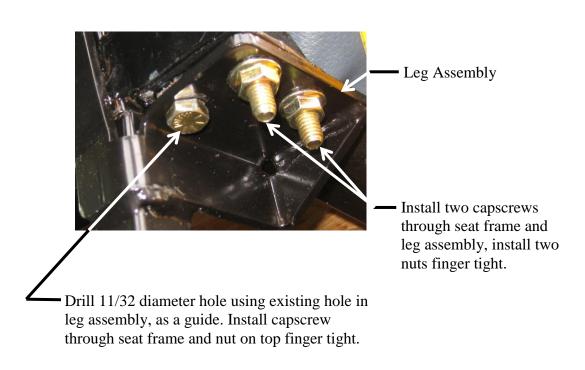

### **Rear Seat Leg Noncompliance**

- 6. Install new leg assembly 00010417 in same location. Align holes in the floor with the leg assembly foot washer. Note: May require a slight tap with rubber hammer to slide foot underneath wheelhouse cover.
- 7. Install two new 3/8-16 X 2 inch capscrews 10021595 through the holes in leg assembly and floor. On the bottom of the floor panel, install rectangular washer 10000930 and 3/8-16 flange lock nut 00543934 on each capscrew finger tight.
- 8. Align holes in leg assembly with two holes in the seat frame. Install two 5/16-18 X 1 inch capscrews 00854406 down through seat frame and leg assembly bracket. Install two 5/16-18 serrated washer nuts 00829390 underneath seat frame finger tight.
- 9. Drill 11/32 diameter hole through seat frame using the leg assembly bracket, as a guide. Install 5/16-18 X 1 inch capscrew 00854406 from the bottom of seat frame upward leg assembly bracket and seat frame. Install 5/16-18 serrated washer nut 00829390 on top of seat frame finger tight.

## **Rear Seat Leg Noncompliance**

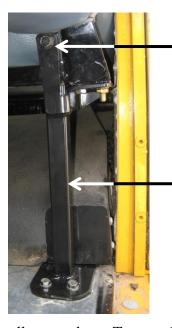

# RECALL

10. Drill 11/32 inch diameter hole through seat frame using vertical flange of the leg assembly bracket as a guide. Be careful **NOT** to damage the upholstery on the seat back pad with drill chuck and bit.

NOTE: Drill bit and drill chuck must not contact upholstery.

11. Install 5/16-18 X 1.75 inch capscrew 10025309 from the vertical flange on the leg assembly through rear of seat frame. Note: If there is a gap between the inside of the vertical flange and the seat frame, install as many 11/32 inch flat washers 01167485, as required to eliminate gap.

Install capscrew through leg assembly and seat frame. Install nut on inside of seat frame. Note: If there is a gap between the back of seat frame and leg assembly, install as many flat washer as needed to remove gap.

Finished installation shown.

- 12. Install serrated nut. Torque all fasteners. Torque 5/16-18 grade 5 to 12 13 FT.LBS. , 5/16-18 grade 8 to 16 18 FT.LBS and 3/8-16 grade 8 to 29-33 FT.LBS.
- 13. Reinstall seat cushion.
- 14. Remove chock and place bus back in service.
