

Service Bulletin

File in Section: -

Bulletin No.: 16-NA-264

Date: August, 2016

TECHNICAL

Subject: Night Vision Works During Daylight Times

Brand:	Model:	Model Year:		VIN:		Engine:	Transmission:
		from	to	from	to		
Cadillac	CT6	2016	2016				

Involved Region or Country	North America and N.A. Export Regions
Additional RPO	UV3
Condition	Some customers may comment that the night vision is on during daylight times.
Cause	This may be caused by the Manufacture Enable Counter (MEC) for the night vision set high from the plant, will ignore the needed parameter inputs that send information to the module.

Correction

The Technician can monitor the MEC counter using the Identification Information screen from the GDS 2. Cycle the ignition switch to decrement the MEC. Once the MEC is at zero, the night vision system will only work when the ambient light status message reports dark.

Warranty Information

Labor Operation	Description	Labor Time
2881118*	Resetting Manufacture Enable Counter using GDS 2	0.3 hr

*This is a unique Labor Operation for Bulletin use only.

Version	1
Modified	

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
