IB12-L-001A

ISSUE DATE:

OCTOBER 2016

GROUP:

FUEL & EXHAUST

DEF LEVEL GAUGE AND DEF TANK SIGHT TUBE DO NOT MATCH

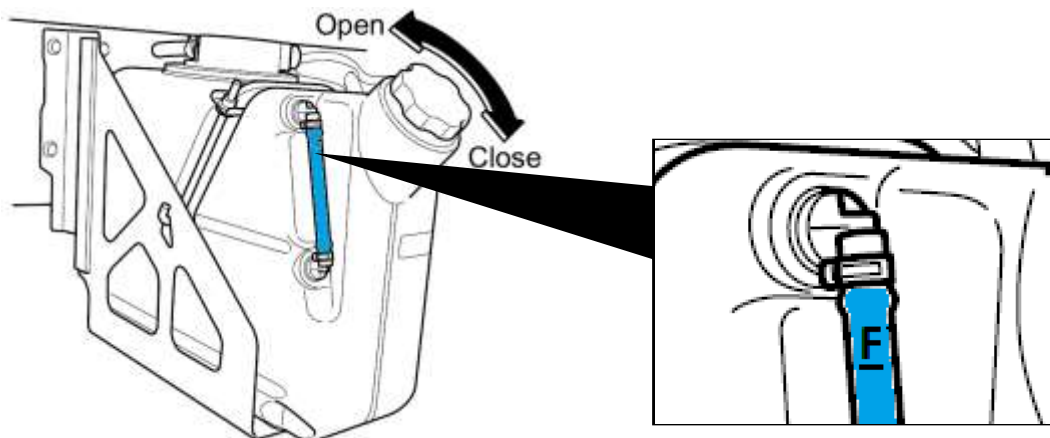

AFFECTED VEHICLES

- All Isuzu N-Series
- All NPR Stripped Chassis (Reach Van)
Equipped with Selective Catalyst Reduction (SCR)

INFORMATION

Important: Do not attempt to repair this condition

Some customers may complain that the DEF Tank Sight Tube and DEF Level Gauge in the MID (Multi Information Display) do not match. The DEF Tank Sight Tube is used for filling purposes only in order to prevent overfilling. Actual DEF level should only be determined by viewing the DEF Level Gauge in the MID.

Note: Do not add DEF above the “F” position. DEF may leak from the breather hose while driving.
