

Rear License Trim Is Cracked or Broken

AFFECTED VEHICLES

2015–16 Fit LX

Do you have a vehicle with a rear license trim that's cracked or broken? This can happen if you pull or push on that trim too hard when opening and closing the tailgate.

We're aware of this concern and we're working to make that trim less prone to damage. A countermeasure is in the works and should be available by this coming August.
