

Service Bulletin

File in Section: 03 - Suspension

Bulletin No.: 07-03-10-008E

Date: June, 2016

INFORMATION

Subject: Information on Slight or Mild Tire Feathering and Recommended Practices (Normal Tire Wear Condition)

Models: 2006-2017 GM Passenger Cars and Light Duty Trucks

Attention: This Bulletin also applies to any of the above models that may be Export from North America vehicles.

This Bulletin has been revised to add the 2016-2017 Model Years. Please discard Corporate Bulletin Number 07-03-10-008D.

This bulletin provides information regarding the normal tire wear condition of slight or mild tire feathering and recommended practices.

If a vehicle comes into a dealership with a concern of slight or mild feathering-type wear on the tires, review with the customer their past tire rotation history. Tires should be rotated every 12,000 km (7,500 mi) for applicable vehicles with tires where a tire rotation is possible or recommended. Refer to the owner manual and review related bulletins for information on tire rotation for vehicles with different front/rear tire/wheel sizes.

SOME TIRE FEATHERING IS A NORMAL PART OF TIRE WEAR AND THROUGH PROPER TIRE ROTATION AND INFLATION, THIS TIRE WEAR CAN BE MINIMIZED AND TIRE LIFE MAXIMIZED.

If the customer has not rotated the tires within the last 12,000 km (7,500 mi), a tire rotation in the modified X-pattern is necessary to clean-up the feathering, rather than placing the vehicle on the alignment machine.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
