### DESCRIPTION

Newmar Corporation has decided that a defect relating to motor vehicle safety exists in specific motor homes.

**Issue:** Certain motorhomes may have a defective refrigerator travel latch that may activate without the user's knowledge when the doors are closed. If the latch locks the door shut, the refrigerator cannot be opened from the inside. This could potentially cause entrapment/injury to an individual. This only applies to French door style refrigerators with a specific travel latch. Attached is a list of specific coaches affected.

### RECOMMENDED ACTION

**Correction:** Newmar will send a new replacement door latch. The new latch cannot be inadvertently locked and can only be activated from the exterior of the refrigerator after the doors are closed. Please follow the attached instructions to complete the travel lock replacement.
