SCREAMIN' EAGLE TUNING FOR 2017 TRIKE MODELS

Purpose

- To clarify the ECM tuning options for MY17 50-state US Trike models.

Summary and Parts Affected

Stage I upgrades are available for MY17 Trike models and these models can be tuned using the Pro Street Tuner.

- Stage I tuning with the Pro Street Tuner is 50-state US EPA compliant on MY17 Trike models.
- Refer to the 2017 Genuine Motor Parts and Accessories Catalog for specific performance air cleaner and exhaust fitment information.

Due to a software issue with the Pro Street Tuner, users are unable to locate the Stage I calibrations for Trike models.

- This software issue will be fixed with the next software release of the Pro Street Tuner. Anticipated release of the software fix will be in January 2017.

Action Required

In the interim, the user has the ability to manually look up the Stage I calibrations for the MY17 Trike models and complete the tuning process. See below for a guide to manually selecting the appropriate calibrations:

- See Figure 1. Click "MANUALLY SELECT FILE".

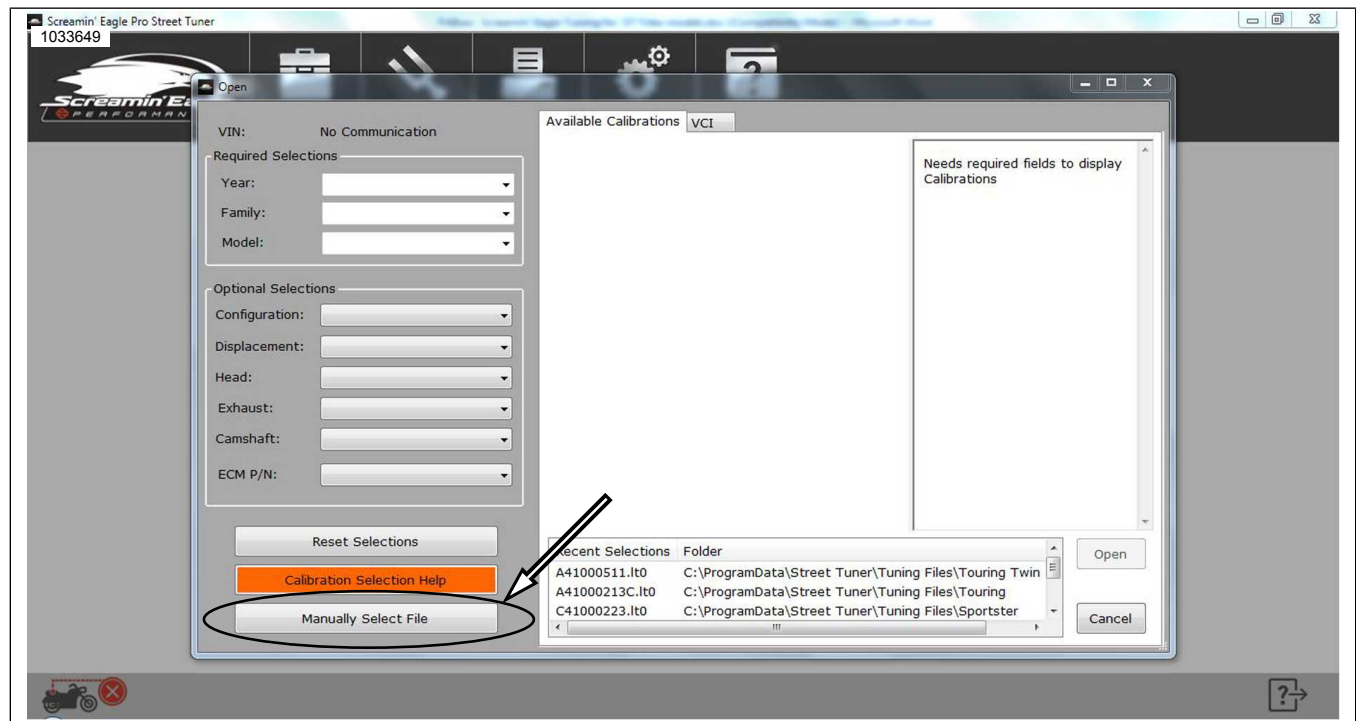

Figure 1.

2. See Figure 2. Select the appropriate calibration for the MY17 Trike model being tuned and click "Open":

- **For an FLRT** use calibration A41000521A. Search in the "Touring" folder

- **For an FLHTCUTG** use calibration A41000520A. Search in the "Touring Twin Cooled" folder

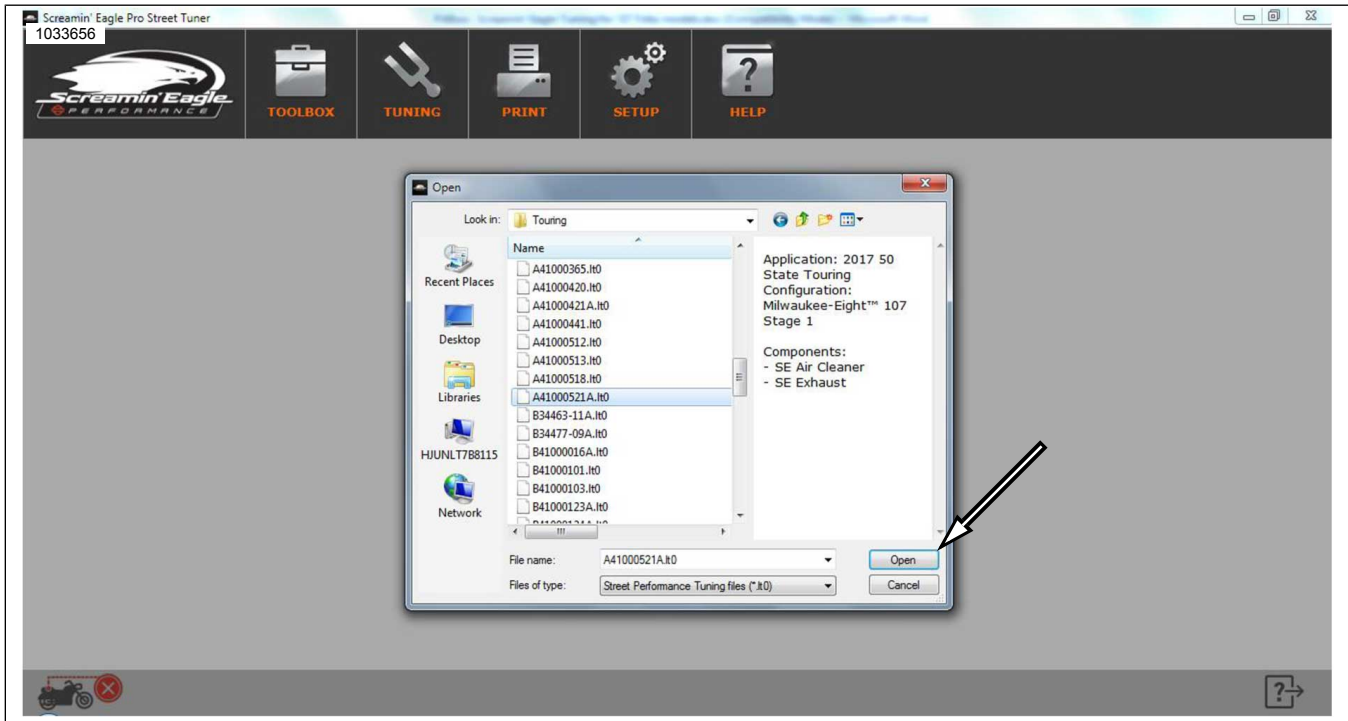

Figure 2.

3. Follow the normal tuning process to properly tune the Trike.

Questions

Please contact Technical Service with any concerns regarding application. Please direct all other questions to your Dealer Services Representative.
